The Magic Keys winningly evokes the coming to maturity of one of the great characters in contemporary American literature: Scooter, the central protagonist of Albert Murray's highly acclaimed autobiographical novels [Train Whistle Guitar](#), [The Spyglass Tree](#), and [The Seven League Boots](#). Growing up brilliant and curious in Alabama, Scooter was told he was destined for greatness. Now newly married and a graduate student in humanities at New York University, he goes about discovering just what he is destined to be great at. Anchored by Eunice, his "Mrs. Me," Scooter makes the rounds of Manhattan's libraries, jazz hangouts, galleries, skyscrapers, and endlessly fascinating streets, meeting the people who will help him find his way: dapper Taft Edison, who is setting their down-home

dialect onto the pages of his novel-in-progress; Joe States, a drummer who brings old expectations to Scooter's new life; and Jewel Templeton, no longer his girl but still a believer. When his budding career takes him back to Alabama, Scooter discovers both the promise of everyday bliss and intimations of adventures to come. In his inimitably musical, ardent prose, Murray captures the joyful rhythms of youth and the pulse of life at the moment when everything seems possible, in an exhilarating, tender, and masterfully crafted novel.

[The Woman who Owned the Shadows](#) National Academies Press
Winner of the (Inaugural) 2022 National Book Foundation Science + Literature Award From a celebrated Chickasaw writer, a spiritual meditation, in prose and poetry, on our relationship to the animal world, in an illustrated gift package. Concerned that human lives and the natural world are too often defined by people who are separated from the land and its inhabitants, Indigenous writer and environmentalist Linda Hogan depicts her own intense relationships with animals as an example we all can follow to heal our souls and reconnect with the spirit of the world. From her modest forest home in Colorado, and venturing throughout the region, especially to her beloved Oklahoma, she introduces us to horses, packrats, snakes, mountain lions, elks, wolves, bees, and so many others whose presence has changed her life. In this illuminating collection of essays and poems, lightly sprinkled with elegant drawings, Hogan draws on many Native nations' ancient stories and spiritual traditions to show us that the soul exists in those delicate places where the natural world extends into human consciousness—in the mist of morning, the grass that grew a little through the night, the first warmth of this morning's sunlight. Altogether, this beautifully packaged gift is a reverential reminder for all of us to witness and appreciate the radiant lives of animals.

Electricity, supplied reliably and affordably, is foundational to the U.S. economy and is utterly indispensable to modern society. However, emissions resulting from many forms of electricity generation create environmental risks that could have significant negative economic, security, and human health consequences. Large-scale installation of cleaner power generation has been generally hampered because greener technologies are more expensive than the technologies that currently produce most of our power. Rather than trade affordability and reliability for low emissions, is there a way to balance all three? *The Power of Change: Innovation for Development and Deployment of Increasingly Clean Energy Technologies* considers how to speed up innovations that would dramatically improve the performance and lower the cost of currently available technologies while also developing new advanced cleaner energy technologies. According to this report, there is an opportunity for the United States to continue to lead in the pursuit of increasingly clean, more efficient electricity through innovation in advanced technologies. *The Power of Change: Innovation for Development and Deployment of Increasingly Clean Energy Technologies* makes the case that America's advantages—world-class universities and national laboratories, a vibrant private sector, and innovative states, cities, and regions that are free to experiment with a variety of public policy approaches—position the United States to create and lead a new clean energy revolution. This study focuses on five paths to accelerate the market adoption of increasing clean energy and efficiency technologies: (1) expanding the portfolio of cleaner energy technology options; (2) leveraging the advantages of energy efficiency; (3) facilitating the development of increasing clean technologies, including renewables, nuclear, and cleaner fossil; (4) improving the existing technologies, systems, and infrastructure; and (5) leveling the playing field for cleaner energy technologies. *The Power of Change: Innovation for Development and Deployment of Increasingly Clean Energy Technologies* is a call for leadership to transform the United States energy sector in order to both mitigate the risks of greenhouse gas and other pollutants and to spur future economic growth. This study's focus on science, technology, and economic policy makes it a valuable resource to guide support that produces innovation to meet energy challenges now and for

the future.

SELECTED BY THE LITERARY GUILD "Extraordinary...If you take up no other novel this year, or next, this one will suffice to hold, to disturb, to enlighten and to inspire you." *NEWSDAY* Early in this century, rivers of oil were found beneath Oklahoma land belonging to Indian people, and beautiful Grace Backet became the richest person in the Territory. But she was murdered by the greed of white men, and the Graycloud family, who cared for her daughter, began dying mysteriously. Letters sent to Washington, D.C. begging for help went unanswered, until at last a Native American government official, Stace Red Hawk, traveled west to investigate. What he found has been documented by history: rampant fraud, intimidation, and murder. But he also found something truly extraordinary--his deepest self and abiding love for his people, and their brave past.

The Power of Change HarperCollins

“Deftly written, gripping and informative. *Empire of Wild* is a rip-roaring read!”—Margaret Atwood, From Instagram “*Empire of Wild* is doing everything I love in a contemporary novel and more. It is tough, funny, beautiful, honest and propulsive—all the while telling a story that needs to be told by a person who needs to be telling it.”—Tommy Orange, author of *There There* A bold and brilliant new indigenous voice in contemporary literature makes her American debut with this kinetic, imaginative, and sensuous fable inspired by the traditional Canadian Métis legend of the Rogarou—a werewolf-like creature that haunts the roads and woods of native people's communities. Joan has been searching for her missing husband, Victor, for nearly a year—ever since that terrible night they'd had their first serious argument hours before he mysteriously vanished. Her Métis family has lived in their tightly knit rural community for generations, but no one keeps the old ways . . . until they have to. That moment has arrived for Joan. One morning, grieving and severely hungover, Joan hears a shocking sound coming from inside a revival tent in a gritty Walmart parking lot. It is the unmistakable voice of Victor. Drawn inside, she sees him. He has the same face, the same eyes, the same hands, though his hair is much shorter and he's wearing a suit. But he doesn't seem to recognize Joan at all. He insists his name is Eugene Wolff, and that he is a reverend whose mission is to spread the word of Jesus and grow His flock. Yet Joan suspects there is something dark and terrifying within this charismatic preacher who professes to be a man of God . . . something old and very dangerous. Joan turns to Ajean, an elderly foul-mouthed card shark who is

one of the few among her community steeped in the traditions of her people and knowledgeable about their ancient enemies. With the help of the old Métis and her peculiar Johnny-Cash-loving, twelve-year-old nephew Zeus, Joan must find a way to uncover the truth and remind Reverend Wolff who he really is . . . if he really is. Her life, and those of everyone she loves, depends upon it.
