Disciplining the Poor explains the transformation of poverty governance over the past forty years—why it happened, how it works today, and how it affects people. In the process, it clarifies the central role of race in this transformation and develops a more precise account of how race shapes poverty governance in the post-civil rights era. Connecting welfare reform to other policy developments, the authors analyze diverse forms of data to explicate the racialized origins, operations, and consequences of a new mode of poverty governance that is simultaneously neoliberal—grounded in market principles—and paternalist—focused on telling the poor what is best for them. The study traces the process of rolling out the new regime from the federal level, to the state and county level, down to the differences in ways frontline case workers take disciplinary actions in individual cases. The result is a compelling account of how a neoliberal paternalist regime of poverty governance is disciplining the poor today.

The news is everywhere. We can't stop constantly checking it on our computer screens, but what is this doing to our minds? We are never really taught how to make sense of the torrent of news we face every day, writes Alain de Botton (author of the best-selling *The Architecture of Happiness*), but this has a huge impact on our sense of what matters and of how we should lead our lives. In his dazzling new book, de Botton takes twenty-five archetypal news stories—including an airplane crash, a murder, a celebrity interview and a political scandal—and submits them to unusually intense analysis with a view to helping us navigate our news-soaked age. He raises such questions as Why are disaster stories

often so uplifting? What makes the love lives of celebrities so interesting? Why do we enjoy watching politicians being brought down? Why are upheavals in far-off lands often so boring? In *The News: A User's Manual*, de Botton has written the ultimate guide for our frenzied era, certain to bring calm, understanding and a measure of sanity to our daily (perhaps even hourly) interactions with the news machine. (With black-and-white illustrations throughout.)
