(PowerBook G4 ...

The first generation of the PowerBook G4 was announced at Steve Jobs' MacWorld Expo keynote on January 9, 2001. The two models featured a PowerPC G4 processor running at either 400 or 500 MHz, housed in a titanium-clad case that was 1 inch (25 mm) deep. This was 0.7 inches (18 mm) shallower than the G4's predecessor, the PowerBook G3. The G4 was among the first laptops to use a screen with a ...

APPLE Service Manuals – Service-Manual.net

The new Titanium PowerBook G4 continues to set the standard for mobilecommunications with both built-in Gigabit Ethernet (10/100/1000BASE-T) and 802.11-based AirPort technology for 11 megabit per second wirelesscommunications. The new 667 MHz PowerBook G4 comes standard with both Gigabit Ethernet and AirPort wireless networking pre-installed.

PowerBook G4 Titanium Series Repair - iFixit

The PowerBook G4 Onyx was released in October of 2001. It included a more powerful processor (550 MHz or 667 MHz) as well as more internal storage (20 or 30 GB). The next Titanium Series laptop was the PowerBook G4 Ivory, released in April of 2002. This model again provided a more powerful processor than its predecessor (667 or 800 MHz).

PowerBook G4 - Wikipedia

Plug in the power adapter and fully charge your PowerBook battery until the battery indicator lights and the onscreen meter (see page 51) indicate that the

battery is fully charged. 2 Disconnect the power adapter and use your PowerBook until you see the first low battery warning dialog box on the screen. 3 Getting Started With Your PowerBook G4 The PowerBook G4 was launched January 9, 2001 at MacWorld Expo and marked a 180 degree change from the curvy plastic PowerBook G3s that had come before (and from the consumer-oriented iBooks then on sale with their iMac-inspired colors and shapes). A cool, sleek 1-inch thick slab of titanium clad futurism that oozed power and brutalist refinement.
