Cosmic Power Little, Brown Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or

defending against ultimate control – from the author of The Laws of Human Nature. In the book that People magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence ( “ Law 1: Never Outshine the Master ” ), others teach the value of confidence ( “ Law 28: Enter Action with Boldness ” ), and many recommend absolute self-preservation ( “ Law 15: Crush Your Enemy Totally ” ). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, The 48 Laws of Power is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

In September 2017, Hurricane Maria hit Puerto Rico, completely upending the energy grid of the small island. The nearly year-long power outage that followed vividly shows how the new climate reality intersects with race and access to energy. The island is home to brown and black US citizens who lack the political power of those living in the continental US. As the world continues to warm and storms like Maria become more commonplace, it is critical that we rethink our current energy system to enable reliable, locally produced, and locally controlled energy without replicating the current structures of power and control. In *Revolutionary Power*,

---

Shalanda Baker arms those made most vulnerable by our current energy system with the tools they need to remake the system in the service of their humanity. She argues that people of color, poor people, and indigenous people must engage in the creation of the new energy system in order to upend the unequal power dynamics of the current system. *Revolutionary Power* is a playbook for the energy transformation complete with a step-by-step analysis of the key energy policy areas that are ripe for intervention. Baker tells the stories of those who have been left behind in our current system and those who are working to be architects of a more just system. She draws from her experience as an energy-justice advocate, a lawyer, and a queer woman of color to inspire activists working to build our new energy system. Climate change will force us to rethink the way we generate and distribute energy and regulate the system. But how much are we willing to change the system? This unique moment in history provides an unprecedented opening for a deeper transformation of the energy system, and thus, an opportunity to transform society. *Revolutionary Power* shows us how.

MacOS Ultimate User Guide

John Wiley & Sons

A “provocative and deeply reported look into the emerging field of deradicalization” (Esquire), told through the stories of former militants and the people working to bring them back into society, from National Book Award and Pulitzer Prize finalist Carla Power What are the roots of radicalism?

Journalist Carla Power came to this question well before the January 6, 2021, attack in Washington, D.C., turned our country’s attention to the problem of domestic radicalization. Her entry point was a different wave of radical panic—the way populists and pundits encouraged us to see the young people who joined ISIS or other terrorist organizations as simple monsters. Power wanted to chip away at the stereotypes by focusing not on what these young people had done but why: What drew them into militancy? What visions of the world—of home, of land, of security for themselves and the people they loved—shifted their thinking toward radical beliefs? And what visions of the world might bring them back to society? Power begins her journey by talking to the mothers of young men who’d joined ISIS in the UK and Canada; from there, she travels

around the world in search of societies that are finding new and innovative ways to rehabilitate former extremists. We meet an American judge who has staked his career on finding new ways to handle terrorist suspects, a Pakistani woman running a game-changing school for former child soldiers, a radicalized Somali American who learns through literature to see beyond his Manichean beliefs, and a former neo-Nazi who now helps disarm white supremacists. Along the way Power gleans lessons that get her closer to answering the true question at the heart of her pursuit: Can we find a way to live together? An eye-opening, page-turning investigation, *Home, Land, Security* speaks to the rise of division and radicalization in all forms, both at home and abroad. In this richly reported and deeply human account, Carla Power offers new ways to overcome the rising tides of extremism, one human at a time.
