Powerbuilder Powersoft Users Guide Version 30

PowerBuilder compiles automatically When you attempt to open a different script in a Script view, PowerBuilder compiles the current script. When you save the object, such as the window containing a control you wrote a script for, PowerBuilder recompiles all scripts in the object to make sure they are still valid.

Powerbuilder Users Guide

When you start PowerBuilder for the first time, the Welcome to PowerBuilder dialog box lets you create a new workspace with or without targets: When PowerBuilder starts, it opens in a window that contains a menu bar and the PowerBar at the top and the System Tree and Clip window on the left.

WinWorld: PowerBuilder 6.x

PowerBuilder provides five built-in global objects that are predefined in all applications. You can create your own versions of these objects by creating a standard class user object inherited from one of the built-in global objects. You can add instance variables and functions to enhance the behavior of the global objects.
