Users Guide - PowerBuilder

PowerBuilder provides five built-in global objects that are

predefined in all applications. You can create your own

versions of these objects by creating a standard class user object inherited from one of the built-in global objects. You can add instance variables and functions to enhance the behavior of the global objects.

Powerbuilder Powersoft Users Guide Version 30

When you start PowerBuilder for the first time, the Welcome to PowerBuilder dialog box lets you create a new workspace with

or without targets: When PowerBuilder starts, it opens in a

window that contains a menu bar and the PowerBar at the top

and the System Tree and Clip window on the left.
