Some say Demiel ben Yusef is the
world's most dangerous terrorist,
personally responsible for bombings and
riots that have claimed the lives of
thousands. Others insist he is a man of
peace, a miracle worker, and possibly
even the Son of God. His trial in New
York City for crimes against humanity
attracts scores of protestors, as well as
media and religious leaders from around
the world. Cynical reporter Alessandra
Russo heads to the UN hoping for a piece
of the action, but soon becomes entangled
in controversy and suspicion when ben
Yusef singles her out for attention among
all other reporters. As Alessandra begins
digging into ben Yusef's past, she is
already in more danger than she
knows—and when she is falsely accused
of murder during her investigation, she is
forced to flee New York. On the run from
unknown enemies, Alessandra finds
herself on the trail of a global conspiracy
and a story that could shake the world to
its foundations. Is Demiel ben Yusef the
Second Coming or the Antichrist? The
truth may lie in the secret history of the
Holy Family, a group of Templars who
defied the church, and a mysterious relic
stained with the sacred blood of Christ
Himself.

Red Bear stood close to the fire and
stretched toward the sky, every muscle
in his body straining. The veins in his
neck stood out like electrical cords. His
voice had gone thin and raspy and the
words came streaming out of him with
a terrible urgency. The words— if in fact
they were words — collided with one
another. [Blackfly Season, page 94]
According to Detective John Cardinal,
the truly diabolical thing about
blackflies is their stealthy silence; there
is no warning and no chance of a pre-
emptive strike. Every year at the
beginning of May, the blackflies take
over Algonquin Bay, swarming in
clouds out of their winter wombs in the
standing water of lakes, creeks and
swamps. But this year, the blackflies
aren't the only ones to make their way
into town. A self-proclaimed shaman
and card-carrying member of the
Chippewa First Nations has also
arrived. Known only as Red Bear, the
mysterious figure has recruited three
young men from town who share a
history of drug use and living on the
fringe. And Red Bear isn't the only
mysterious visitor. At the World Tavern,

the oldest but perhaps least reputable bar in the city of Algonquin Bay, OPP officer Jerry Commanda is enjoying his regular Friday night Diet Coke with a squeeze of lemon. He meets a young red-haired woman who is unable to tell him her name, where she lives, or how she came to be at the World Tavern. It's not until a hospital X-ray reveals a bullet lodged in her brain that the reason for her amnesia becomes clear. When John Cardinal and Lise Delorme are called in to take over the case from Commanda, they don't have a lot of leads on who this mysterious redhead is, let alone why someone would want her dead. And when the mutilated body of a member of the local biker gang the Viking Riders is discovered near long columns of bizarre hieroglyphics, Cardinal and Delorme begin to suspect that it is isn't just Viking Rider justice. Despite the climbing body count, Cardinal is distracted. His wife, Catherine, has left to go to Toronto with a group of her photography students and Cardinal is convinced that the stress and excitement of the trip will push her to the breaking point. His worst fears are confirmed when a call reaches him from a student concerned by Catherine's erratic behaviour. Cardinal speeds to Toronto to reach his wife before she unravels. When Cardinal returns, a third body turns up with a bullet from the same gun that shot the redhead. Linking the three murders and finding out who's responsible becomes an intricate game of unravelling the secrets of families and decoding the mysteries of an ancient form of African voodoo.

eruption defects. In addition, detailed consideration is given to the interceptive management of class II and class III malocclusion and transverse discrepancies. There is an emphasis on evidence-based management of these developmental problems and each chapter is richly illustrated with clinical examples.
