The PR-24 police baton helps to bridge the wide gap between the final force of the firearm and the ineffective or abusive use of the conventional police baton. Used properly, this new baton can defend without destroying, control without crushing. This training manual provides instructions for using this new baton. The objective of this manual is to provide instruction for as many instinctive techniques as the average law enforcement officer will need in order to defend himself and to neutralize an adversary in any given situation which calls for something less than the use of a firearm.

For Security Personnel, SOFT EMPTY
HAND CONTROL, 2020 M ü rsel Sevindik,

For Security Personnel, HARD EMPTY HAND CONTROL, 2020 Lulu Press, Inc
This is a manual will be of interest to not only all Law Enforcement Defensive Tactics Instructors, but to anyone in the law enforcement field who is concerned about the facts and fallacies floating around this field. The following are just a sample of the questions this basic guide will answer: - Is law enforcement defensive tactics a science - Do the

techniques and tactics you were taught always work on the street - What is reality based training as it applies to defensive tactics - Is there any formal martial art which is perfect for police officers - Should officers be taught striking techniques - Is the PR-24 Police Baton just a Tonfa - Is training once a year sufficient to remain competent in defensive tactics

2020- M ü rsel Sevindik
This book will show you how a simple writing tool can easily be turned into an effective self-defense weapon with just a little knowledge, practice, determination and imagination. This is to my

knowledge, the first manual ever written that deals primarily with the use of the pen as a self-protection tool. Some of the areas this book will cover include choosing the best pen for self-defense, carrying methods, how to grip the pen for most effectiveness, the right to self-defense and the law, vulnerable areas of the body and specific techniques and tactics to use the pen for self-defense. When you finish this text, you will be more aware and confident in your ability to defend yourself using a simple pen or pencil. The key to defending yourself must always begin with the realization that your own body has numerous areas that can be used as a self-defense tool.

For Security Personnel, DEFENSIVE BATON,
2020 M ü rsel Sevindik

This book covers Officer Survival Skills issues for law enforcement officer. The goal is to develop the law enforcement officer's understanding of officer survival for the safe and efficient performance of their duty. The majority of police

officers duties become routine, though the potential for danger is always present. The duties of the officer require them to enforce laws, and to control the illegal actions of certain citizens. Survival techniques, if properly applied, provide the officer an opportunity to overcome the resistive behavior of subjects. These techniques also provide officers with self-confidence, which is needed to "win". When an officer uses force, peers, the public, the media, the government and the world review that actions. If the officer applies inappropriate force, it reflects poorly on the individual and gives a non-professional appearance to the entire force. The officer is subject to legal limitations. When the officer is faced with a violent situation, it is required that he make decisions in a fraction of a second. He may have to justify his actions in court. Therefore, proper defensive tactics training provides the

officer with the tools required not only to apply the proper techniques, but also to decide the proper level of force necessary to overcome resistance. This will obviously enhance officer survivability, insure proper performance during the situation, and justification in court. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement.

Is It Routine? Springer Nature

This book covers "Weapon Retention and Gun Disarming, Handcuffing, Conducting Suspect Searches, and Defensive Baton" subjects for law enforcement officer. In some close encounters, a suspect may try to grab the officer's sidearm. Loss of the officer's gun could mean the loss of his/her life. The officer or civilians may be killed or injured by

offenders who take and use an officer's firearm. Officers must develop a defensive awareness that their weapon can be snatched. Handcuffs are temporary restraining devices designed to control the movements of a subject. However, they do not entirely immobilize a suspect. Its proper use and application is crucial for the safety of the officer, subject, and public. Body searching is a vague topic. It is a careful, systematic examination of the suspect at the scene of a crime, or immediately after apprehension. Failure to conduct a proper search could cost an officer's or civilians' life. Modern law enforcement tool, baton, has been developed to increase officers' ability to protect themselves, particularly in those cases not justifying the use of deadly force. A trained officer who is proficient in the use of the baton

is better able to protect himself and is less likely to resort to the use of his firearm. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement.

2020 -2-
M ü rsel Sevindik,

The straight stick has probably been used as a self-defense tool since a human made the first footprints on earth. Through the ages variations of the stick and staff have been created to make a better self-defense tool. The straight stick was

turned into spears and swords. Understanding the basic use of the straight police baton makes it possible to use numerous other objects for self-defense. In fact, the same techniques taught for using the police baton relate to a host of stick fighting and sword arts such as Hanbo- Jutsu, Jo- Jutsu, Wakizashi-Jutsu and similar weapon combat systems. It is hoped this book will provide a basic overview of the many ways a straight baton can be used for self-defense, control and takedowns for law enforcement, security officers and martial artists studying weapons.

Angeles in 1979. This account discusses the incident, the civil suit Rodr í guez brought against the police, and the lessons he learned about police brutality and legal justice for minorities.

The PR-24 Police Baton M ü resl Sevindik,

This book covers "Officer Survival Skills, Use of Force, Soft Empty Hand Control, Hard Empty Hand Control, Weapon Retention and Gun Disarming, Handcuffing, Conducting Suspect Searches, and Defensive Baton " issues for law enforcement officer. The most important priority of the officer is able to survive in dangerous situations. These techniques provide officers self-confidence, which is needed to "win". Law enforcement officers are authorized to use a range of force options to preserve the peace, prevent crimes, maintain order, and apprehend suspects. Soft empty hand techniques are the first option of physical response used to restrain a person who is resisting. Hard Empty Hand Control techniques are defined as striking techniques.

In some close encounters, a suspect may try to grab the officer's sidearm. Officers must develop a defensive awareness that their weapon can be snatched. Handcuffs are temporary restraining devices designed to control the movements of a subject. Body searching is a careful, systematic examination of the suspect at the scene of a crime, or immediately after apprehension. A trained officer who is proficient in the use of the baton is better able to protect himself and is less likely to resort to the use of his firearm. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement. Lethal Force and New Zealand Police M ü rsel Sevindik,

This book covers Handcuffing issues for law enforcement officer. The goal is to understand and be able to perform proper techniques of using handcuffs. Handcuffs are temporary restraining devices designed to control the movements of a subject. Officers may routinely use handcuffs to control, restrain and transport persons. Restraining devices will be applied properly and in accordance with training received, so as to minimize the risk of unnecessary injury. The design of handcuffs ensures that the subject's movements are controlled to reduce the risk of injury to the police officer, members of the public, and the subject himself. The most common types of handcuffs used in law enforcement today are the traditional and hinged variety. In addition, officers also use plastic cuffs, in some situations. Handcuffs do not entirely immobilize a suspect. Regardless of the type used, it is imperative that

officers be aware that the police style handcuff is a temporary restraining device and that its proper use and application is crucial for the safety of the officer and subject. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement.

Police Products Handbook M ü rsel Sevindik

2020-_____ M ü rsel Sevindik,

This book covers Hard Empty Hand Control issues for law enforcement officer. The goal is to provide

police officers with an understanding of the principles of Hard Empty Hand Control techniques. Hard Empty Hand Control techniques are defined as striking techniques. These techniques are used to control active aggression, with empty hands and feet, when the intermediate use of weapons is justified, but are not tactically available. The term hard is descriptive of the nature of the technique. Hard empty hand strikes are always defensive not offensive. These techniques are taught to protect lives from immediate danger. All hard empty hand control techniques are basic in nature; however, they address non-lethal use of force situations, and are generally reliable and effective when properly utilized. Police officers should learn and demonstrate knowledge of the striking areas as well as methods of striking. When these techniques become necessary, loud, clear, repetitive verbal commands are an important aspect of the control process. The subject needs to know what the officer desires him/her to do. In addition verbal and physical de-escalation is always preferred and should be

attempted, if applicable. In training, safety is paramount. Perfect practice makes perfect. Proper technique is more important than the speed of technique application. Proficiency will increase the speed proportionally. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement.

DEFENCE and INTERVENTION -1- M ü rsel Sevindik

John Stanley Ortmann was having a routine day when he got the call: A mountain lion that had killed a sheep had possibly been shot and was hiding out in a brushy area near a busy road. Armed with catch poles, a syringe with a euthanasia drug, and carrying a .40-caliber semiautomatic pistol, he located the mountain lion but had to crawl into the brush to catch him. That's when the mountain lion surged into an opening in the brush, forcing Ortmann to his

back. He had just enough time to draw his pistol and fire two shots. The mountain lion landed on top of him dead. Ortmann shares that story and many more in this memoir highlighting his adventures and challenges with the Army Military Police, as a city policeman and detective, and as a game warden. From the early 1960s well into the twenty-first century, he describes the training he received as well as the evolution of law enforcement equipment. He also makes the case that no matter how routine a situation may seem, it can turn out differently and you always have to be on your guard.
