Improve your odds of passing one of the most highly sought-after exams for developers working with Microsoft's cloud platform: Exam AZ-204: Developing Solutions for Microsoft Azure. This book guides you through practical examples of each of the technologies covered by the exam while exposing you to the settings and interactions between platform solutions that you will need to be in command of to prepare for the exam and to use on your job in Azure development. Chapters in this book correspond directly to the exam skills outline and are delivered in a "from-the-ground-up" approach, allowing you to build your knowledge as you go. This approach serves to help even novice developers get up to speed quickly, while allowing more experienced developers to find the exact topics and scenarios they need to hone their skill sets as they both prepare for the exam and reference information for real-world solutions. As you work through each chapter, you will get an introduction to the topic of the chapter followed by a comprehensive discovery of the key elements of the Azure service(s) being covered. You'll be guided through solutions by studying typical, real-world scenarios. Each chapter concludes with review questions to solidify your learning and includes links to the corresponding Microsoft Learn modules that are relevant to the concepts in the chapter and associated with each section of the AZ-204 exam. What You Will Learn Know the essential platform services of Azure Develop and deploy secure and robust web solutions Architect and create serverless solutions Manage containers in the Azure Containers ecosystem Choose the correct messaging and event-handling tools for your applications Master real-world examples and challenges that help prepare you for the AZ-204 exam Who This Book Is For Developers planning to take the AZ-204 exam, and developers who want to learn more about development on the most common Azure platform services

This volume includes a number of papers written in English and published in the last fifteen years in which the Italian labour market faced many changes. The book not only provides the international readership with a frame of reference – in both conceptual and legal terms – that helps to appreciate the Italian Labour Law currently in force, but also represents a contribution to moving beyond the self-referential nature of the Italian debate on the reform of labour laws. As such, the book supplies the reform process of the Italian labour market with an international and comparative dimension which – in accordance with the programmatic approach of Marco Biagi – will also feed the debate at the national level.

Finally, a comprehensive collection of world-renowned equine expert Linda Tellington-Jones' healing equine bodywork and training exercises, for use both on the ground and in the saddle. In one fabulously illustrated book, those new to Linda's approach are provided with a clear, step-by-step introduction to the Tellington Method, while those familiar with her work finally have the ultimate go-to reference. The book is divided into three parts. Part One briefly explains the background of the Tellington Method and then discusses the reasons for unwanted behavior and poor attitude in horses. Part Two, arranged alphabetically, contains a compendium of 72 common behavioral, training and health issues, many of which horse people face on a daily basis. In this A to Z format, from Aggressive to Other Horses to Weaving, Linda discusses the possible reasons for these behaviors or problems and offers conventional methods of solving these challenges, as well as training solutions using the Tellington Method. Part Three presents—for the first time in one volume—the complete body of work that makes up the Tellington Method: the Tellington TTouches, Ground Exercises, and Ridden Work. At the end of this section, there is also a detailed case study, which includes 49 photographs showing every step along the way to successfully teaching your horse to load.

If you can read a map for traveling from Point A to Point B, then, here is a practical

step-by-step manual detailing a method anyone can learn to use for coaching someone to change behaviors, or help them improve their self-esteem. The author has managed to mix the best tools of Esteem Therapy and Reality Therapy with the unique concept of "Behavior Mapping" in a very easy-to-understand way that anyone capable of coaching can immediately use. Detailed examples of how to use this method are given using case studies from working with normal families having children with very common problem behaviors. To underscore the significance of this method, an appendix is included with the results of a 3-year substance abuse treatment program conducted using the general techniques described in the book, while under contract with the Arizona Department of Juvenile Corrections. The success rates for both general recovery and improved self-esteem, etc. for the 108 cases was considered remarkable. While this book was written specifically for the lay person, those working in institutional settings, or child care of any kind can apply much of the knowledge presented here. Professionals certainly may benefit from the information included in the appendix.

Eating disorders such as anorexia nervosa and bulimia nervosa pose a grave danger to the health of thousands of Americans each year. This sourcebook brings together in a single volume an extensive amount of information and resources regarding the diagnosis and treatment of these potentially life-threatening conditions. This volume is a substantially updated and expanded version of Controlling Eating Disorders with Facts, Advice, and Resources (Oryx, 1992).

Library Services for Persons with Disabilities W. W. Norton & Company In recent years there has been heightened interest in the clinical and legal management of families in which children resist contact with one parent and become aligned with the other following divorce. Families affected by these dynamics require disproportionate resources and time from mental health and legal professionals, and cases require a specialized clinical approach. Traditional models of individual and family therapy are not designed to address these issues, and strategies and resources for mental health and legal professionals have been extremely limited. Overcoming Parent-Child Contact Problems describes interventions for families experiencing a high conflict divorce impasse where a child is resisting contact with a parent. It examines in detail one such intervention, the Overcoming Barriers approach, involving the entire family and combining psycho-education and clinical intervention. The book is divided into two parts: Part I presents an overview of parental alienation, including clinical approaches and a critical analysis of the many challenges associated with traditional outpatient family-based interventions. Part II presents the Overcoming Barriers approach, describing core aspects of the intervention and ways to adapt its clinical techniques to outpatient practice. Overcoming Parent-Child Contact Problems is geared toward mental health clinicians and legal professionals who work with families in high conflict and where a child resists visitation with a parent.

One part theory (borrowed from business world), one part practice (including detailed case studies of the University of Pittsburgh and the University of Arizona), one part inspiration: Beyond Survival offers ideas about how academic libraries can not only survive in the short term, but take advantage of emergent opportunities by judiciously adopting the same organizational development tools and concepts espoused by the business world. While there is a great deal of anecdotal evidence that significant organizational changes are taking place in academic libraries, the literature suggests that most of these changes take the form of evolutionary, or incremental improvement. But what happens when libraries find themselves in a society characterized by increased information availability compression of time and space, and growing turbulence and unpredictability? These are conditions with which the business world has been grappling for years, conditions that require not an evolutionary approach, but nimbleness and rapid response. One part theory (borrowed from business world), one part practice (including detailed case studies of the
