Relations between societal values and legal doctrine are inevitably complex given the time lag between law and social reality, and the sociological space between legal communities involved in the development and application of the law and non-legal communities affected by it. It falls on open-ended concepts, such as proportionality, human rights, dignity, freedom, and truth, and on legal frameworks for balancing competing rights and interests, such as self-defense, command or corporate responsibility, and restrictions on freedom of expression, to negotiate chronic tensions between law and society and to bridge existing gaps. The present volume contains

chapters by leading experts former judges on constitutional courts and international courts, and some of the world's leading criminal law, public law, and international law scholars offering their points of view and professional analysis of legal notions and doctrines that serve as hubs for the interpretation, application, and contestation of core values, which in turn constitute building blocks of the rule of law. The shared perspective on the interplay between values and legal rules in public law, criminal law, and international law is likely to render the publication a valuable resource for both theoreticians and practitioners, law students, and seasoned legal experts working in diverse legal fields.

How does copyright law take into account the interests of third parties, especially the general public's interest in the greatest possible dissemination of knowledge and culture? Twelve basic questions give copyright law experts from more than forty countries the opportunity to provide answers related to their national law on the following matters: categories of works and subject matter, eligibility conditions, duration, "users' rights," the three-step test, misuse, differentiations between categories of right holders, TPM, and relations of copyright law to other legal areas such as fundamental rights, competition law, consumer protection law, media law etc. The standardized form of the reports makes it easy to see the impacts of copyright law in the industrialized countries as well

as in emerging economies; in common-law and civil-law approaches; in countries of the Andean Community and of the European Union, as well as in countries that are not party to the WIPO Treaties. A detailed preliminary chapter provides an approachable overview of issues and results. This chapter also discusses the voice of academia, represented by the European Copyright Code of the "Wittem Group."

This book examines the concept of nationality of means of transportation in terms of jurisdiction in international law. It reassesses the definition of

nationality and explores how it is conferred. The book first places nationality in the broader perspective of jurisdiction in international law, and examines the historical development and necessity of the nationality of means of transportation. It goes on to investigate whether and under which conditions international organizations may confer a 'nationality' on means of transportation, examining the law of the sea conventions and air and space treaties. The book finally explores several questions relating to international registration of means of transportation, building a regime of international registration. Vincent Cogliati-Bantz introduces a necessary distinction between transport internationally registered and transport registered in a State but fulfilling a mission for an international organization. As a work that proposes the ability for international organisations

to access international spaces without reliance on State-registered means of transport, this book will be of great use and interest to scholars and students of public international law, international organisations, and maritime, space, and aviation law.

This open access book revisits common notions on how to select and recruit the right employees. It reveals that the secret of successful individuals and teams lies in

a combination of talent and four important performance indicators, offering an innovative approach that companies can fruitfully adopt. Bas Kodden has studied key performance indicators among over 1,100 executives, senior staff and professionals, including 50 CEOs from leading Dutch companies. His findings put the present recruitment and selection procedures used by many prominent companies in a new light. Moreover, the book not only addresses theory; it also offers a practically applicable model for recruitment, selection and professional development. In closing, the book includes a variety of questionnaires and checklists for HR professionals and executives whose goal is to build sustainable and successful teams and

organizations.

'Medical need' is a factor in health care access decision-making, but merit-considerations are becoming important too. In the shortening of waiting time, priority arrangements are considered and/or introduced, based on non-medical criteria. Simultaneously, in terms of financing, health status has become important due to payment arrangements, limited insurance package options, etc. At the same time, health status disparities, due to socioeconomic inequalities, seem to be increasing. Under these circumstances, confronted with increased health spending, it is expected that rationing will become more eminent. Due to this, the emerging relevant questions are: Who will be responsible for rationing (the market, governments, bureaucrats,

physicians, or others)? * How does it function (explicit or implicit)? * What are relevant and acceptable selection criteria (QUALYs, DALYs, health status, sex, age, etc.)? * To what extent is current rationing just? * What can be done to make it more just? *

The social worker's guide to integrating theory and practice
Applying Theory to Generalist Social Work Practice teaches aspiring social workers how to apply theory in real world practice. Fully aligned with the Council on Social Work Education's 2015 Educational Policy and Accreditation Standards, the book links theory to practice with clear, concise instruction including a discussion of evidence-based practice. Twelve commonly-used theories are thoroughly explained, with discussion of the strengths and

limitations of each, and applied to real work with individuals, groups, families, communities, and organizations. The book includes case studies and first-person contributions from practicing social workers to illustrate the real-world scenarios in which different concepts apply. Critical thinking questions help students strengthen their understanding of the ideas presented. Tools including a test bank, PowerPoint slides, and an instructor's manual are available to facilitate classroom use, providing a single-volume guide to the entire helping process, from engagement to termination. Practice is a core foundational course for future social workers, but many practice texts focus on skills while neglecting the theoretical basis for social work. Applying Theory to Generalist Social Work Practice fills that gap by covering both skills and theory in a single text. Examines the applications of prevailing social theories Covers the most common theories used in micro, mezzo, and macro practice Helps readers understand well-

established approaches like strengths perspective, humanistic and client-centered, task-centered, and solution-focused brief therapy Shows how to apply major theories including ecological/system, cognitive/behavioral, conflict, empowerment, narrative, crisis, critical, and feminist An effective social worker recognizes the link between theory and practice, and how the two inform each other to culminate in the most effective intervention and most positive outcome for the client. Applying Theory to Generalist Social Work Practice provides students with a roadmap to the full integration of philosophy and application in social work.

The fact that the Montego Bay Convention has been only ratified by 37 States at present and that it will be some time before the 60 ratifications required by

Article 308 are achieved has not prevented states from acting in accordance with the rules drawn up by the Conference. Close on one hundred states have established either exclusive economic zones broadly modelled on Part V or 200-nautical-mile fishery zones and drawn on the principles laid down for exploiting living resources. Although these laws have been formulated unilaterally by states, international custom, since the judgement by the International Court of Justice in the Fisheries Case of 18 December 1951, is derived from concordant national rules. This shift began even before the Conference ended, and has been consolidated since then. Moreover, the régime governing the sea-bed beyond the limits of national

jurisdiction defined by Part XI, which was the stumbling block of the Conference, is subject to transitional arrangements on the basis of two resolutions adopted in the Conferences Final Act, one providing for the establishment of a Preparatory Commission and the other on the preliminary activities of pioneer investors. This two-volume work, an earlier edition of which appeared in French, has been written by a team of experts of international renown. It presents an analysis of the Convention with an additional Chapter on the legal régime governing underwater archaeological and historical objects.

This book looks at the consumer protection offered in a range of Asian countries, for example

China, Japan, and South Korea in key areas such as consumer sales law, unfair terms, product liability, and unfair commercial practices. However, it is interesting to note that consumer protection is on the rise everywhere and to compare how this differs depending upon the legal cultures. It is also fascinating to reflect on the influence of models for law reform such as the EU laws. ASEAN has also affected the development of consumer policy for its member states. The book takes the form of national reports which explain the development of the law and also shed light on how the law works in practice. The book also contains thematic reports which look at each area of the law from a comparative perspective. Commentators from around the globe reflect on their impression of Asian consumer law based on their own differing legal systems and benchmarks. A must-read for anyone with an interest in consumer law in Asia and beyond, this book will form the basis of further research and discussion internationally.

The All India Digest, Section Ii (civil), 1811-1911 MDPI Competition law in the EU includes a wide range of topics and has developed into a very comprehensive area of regulation. This book covers the broader perspective of competition law, giving an overview of a very complex domain of EU law. Through all relevant sources of primary and secondary EU law the book presents the intricacies of the present competition framework for businesses and public entities. It draws the lines between the different areas, and between competition law and the internal market project. The book covers all aspects of traditional EU competition law, as well as issues not formally regulated in the TFEU section on competition rules – the competition issues of the liberalised sectors and public procurement. Among the matters covered are the following: • the substantive rules on Articles 101 and 102 TFEU; • the enforcement rules of these provisions; • merger control; • the liberalised sectors, with focus

on energy, transport, postal services and telecommunication; • state aid; • public undertakings; and • public procurement. With its enhanced view of EU competition policy, regulation, and enforcement, and its emphasis on specific industry sectors, this book offers an unusually thorough view of aspects of competition law which play an essential role in regulating the conduct of undertakings and public authorities in the market. It will be of special value to any lawyer, policymaker, or scholar active in European competition law.

What gives some people the
right to issue commands to
everyone else and force
everyone else to obey them?
And why should people
obey the commands of those
with political power? These
two key questions are the
heart of the issue of political
authority, and, in this
volume, two philosophers
debate the answers. Michael
Huemer argues that political
authority is an illusion and
that no one is entitled to rule
over anyone. He discusses
and rebuts the major
theories supporting political
authority's rightfulness:
implicit social contract
theory, hypothetical contract

theories, democratic theories of authority, and utilitarian theories. Daniel Layman argues that democratic governments have authority because they are needed to protect our rights and because they are accountable to the people. Each author writes two replies directly addressing the arguments and ideas of the other. Key Features Covers a key foundational problem of political philosophy: the authority of government. Debate format ensures a full hearing of both sides. A Glossary includes key concepts in political philosophy related to the issue of authority. Annotated Further Reading sections point students to additional resources. Clear, concrete examples and arguments help students clearly see both sides of the argument.

A Foreword by Matt Zwolinski describes a broader context for political authority and then traces the key points and turns in the authors' debate.

Since the 1950s,

globalization has been an increasingly irresistible trend and one that has exerted a tremendous impact on the political, economic, military, environmental, and social fortunes of mankind – and yet, existing theories in humanities and social sciences have been fundamentally built upon the traditional “nation-state” model. These two volumes, a pioneering work on global studies to be published out of China, aims at creating a new theoretical framework

against the backdrop of globalization. Volume 1 introduces the core concepts and discusses the critical issues of globalization while the editors redefine notions of politics, economics, law, and globality while deploying globalization as a theoretical framework. Volume 2 examines the multi-level and multi-dimensional nature of globalization, analysing processes and systems of global society in the light of globalization, and exploring the construction of a stable and rational global order. These two volumes of global studies are an essential reference for scholars and students in politics, economics, international relations and law.
