Im in 7th grade and I finished this problem in 20 sec and the answer is $x = 2$. step by step is $5x+3=7x-1$ → you minus 5x on both sides because it is the smaller variable and you get $3 = 2x-1$. The opposite of subtraction is addition, we need to isolate the x variable by getting rid of the -1 so we do $(-1) + 1$ is 0 and we do it on both sides of the equal sign. then the equation would be $3 + 1$...

Free math lessons and math homework help from basic math to algebra, geometry and beyond. Students, teachers, parents, and everyone can find solutions to their math problems instantly.

[Algebra 1 | Math | Khan Academy](#)

Algebra problems are easier to solve when you know the rules and formulas. Unlike other subjects where you can just read or listen and absorb the information sufficiently, math takes practice. The only way to figure out how the different algebraic rules work and interact with one another is to get into the problems and get your hands dirty, so to speak.
