Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual and Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

All the fundamentals. No fluff. Learn more with less! A truly revolutionary American Government textbook, Christine Barbour's AmGov: Long Story Short, responds to the needs of today's students and instructors through brevity and accessibility. The succinct ten chapters are separated by tabs that make it easy to skim, flip, revisit, reorient, and return to content quickly. Reading aids like bullets, annotations and arrows walk students through important facts and break up the material in short, engaging bites of information that highlight not only what is important but why it's important. Though brief, this core book is still robust enough to provide everything that students need to be successful in their American Government course. Whether for the on-the-go student who doesn't have time to read and digest a lengthy chapter, or the instructor who wants a book that will stay out of their way and leave room for plenty of supplementary reading and activities, AmGov provides a perfectly simplified foundation for a successful American Government course.

Weaving into the narrative his own firsthand field experiences around the world, the author, an ecologist brings ecology alive while giving a solid understanding of the science at work behind today's pressing environmental issues. He delves into topics including deforestation, biodiversity loss, over fishing, population growth, use of fossil fuel and climate change while discussing the real consequences of our growing ecological footprint. Coral reefs are on track to become the first ecosystem actually eliminated from the planet. So says the author in this crash course on the state of the planet. He draws from his own extensive work on coral reefs, and from recent research by other ecologists, to explore the many ways we are changing the Earth and to explain why it matters. Most important, this book emphasizes that a gloom-and-doom scenario is not inevitable, and as the author explores alternative paths, he considers the ways in which science can help us realize a better future.

Boater' Guide Simon and Schuster

A magical bloodline. A family curse. Can Connie break the spell before it shatters her future? A bewitching novel of a New England history professor who must race against time to free her family from a curse, by Katherine Howe, New York Times bestselling author of *The Physick Book of Deliverance Dane*. Connie Goodwin is an expert on America's fractured past with witchcraft. A young, tenure-track professor in Boston, she's earned career success by studying the history of magic in colonial America—especially women's home recipes and medicines—and by exposing society's threats against women fluent in those skills. But beyond her studies, Connie harbors a secret: She is the direct descendant of a woman tried as a witch in Salem, an ancestor whose abilities were far more magical than the historical record shows. When a hint from her mother and clues from her research lead Connie to the shocking realization that her partner's life is in danger, she must race to solve the mystery behind a hundreds'-years-long deadly curse. Flashing back through American history to the lives of certain supernaturally gifted women, *The Daughters of Temperance* Hobbs affectingly reveals not only the special bond that unites one particular matriarchal line, but also explores the many challenges to women's survival across the decades—and the risks some women are forced to take to protect what they love most.

Eighteen countries. Five shock absorbers. Two bikers. One amazing adventure... After their fantastic trip round the world in 2004, fellow actors and bike fanatics Ewan McGregor and Charley Boorman couldn't shake the travel bug. Inspired by their UNICEF visits to Africa, they knew they had to go back and experience this extraordinary continent in more depth. And so they set off on their 15,000-mile journey with two new BMWs loaded up for the trip. Their route took them from John O'Groats at the northernmost tip of Scotland to Cape Agulhas on the southernmost tip of South Africa. Along the way they rode some of the toughest terrain in the world -- and met some of the friendliest people. They rode their bikes right up to the pyramids in Egypt and visited Luke Skywalker's house in Tunisia. They met people who had triumphed over terrifying experiences -- former childhood soldiers in Uganda and children living amidst the minefields of Ethiopia. They had a close encounter with a family of gorillas in Rwanda and were nearly trampled by a herd of elephants in Botswana. Riding through spectacular scenery, often in extreme temperatures, Ewan and Charley faced their hardest challenges yet. With their trademark humor and honesty they tell their story -- the drama, the dangers and sheer exhilaration of riding together again, through a continent filled with magic and wonder.

Canadian Life Saving Manual

What begins as the sheer desire for adventure turns into a spiritual quest as a young woman comes to terms with her family, her dreams, and her first love. Tania Aebi was an unambitious eighteen-year-old, a bicycle messenger in New York City by day, a Lower East Side barfly at night. In short, she was going nowhere—until her father offered her a challenge: Tania could choose either a college education or a twenty-six-foot sloop. The only catch was that if she chose the sailboat, she'd have to sail around the world—alone. She chose the boat, and for the next two and a half years and 27,000 miles, it was her home. With only her cat as companion, she discovered the wondrous beauties of the Great Barrier Reef and the death-dealing horrors of the Red Sea. She suffered through a terrifying collision with a tanker in the Mediterranean and a lightning storm off the coast of Gibraltar. And, ultimately, what began with the sheer desire for

adventure turned into a spiritual quest as Tania came to terms with her troubled family life, fell in love for the first time, and—most of all—confronted her own needs, desires, dreams, and goals...

#### Guide to Surviving Life

Since the Titanic disaster of 1912, the horrors of major maritime casualties have prompted international conventions and domestic legislation, but the link between events and outcomes (which are often separated by many years) is rarely understood by those working in the maritime industry. This book, the only comprehensive guide to this link, sets forth the major casualties of the last hundred years and explains resulting regulatory changes. Taking a macro-level view, it describes the trends and reactions across decades, and how, over time, focus has shifted from equipment failures to people and their behaviors as the primary cause of maritime casualties. Timely and thorough, it also explores the alarming increase in the criminalization of maritime accidents, especially the relatively recent reclassification of pollution incidents as "environmental crimes." This book offers broad insight to the history, laws, and conventions that regulate worldwide commercial maritime activity.
