New Directions Publishing
Gary Snyder has been a major cultural force in America for five decades. Future readers will come to see this book as one of the central texts on wilderness and the interaction of nature and

culture. The nine essays in The Practice of the Wild reveal why Snyder has gone on to become one of America's cultural leaders, comprehending things about our world before they were ever discussed in public. With thoughts ranging from political and spiritual matters to those regarding the environment and the art of becoming native to this continent, this collection of essays, first published in 1990, reflect the mature centerpiece of the author's work and thought.

"A reaffirmation of a back country of the spirit."—Kirkus Reviews "A reaffirmation of a back country of the spirit."—Kirkus Reviews This collection is made up of four sections: "Far West"—poems of the Western mountain country where, as a young man. Gary Snyder worked as a logger and forest ranger; "Far East"—poems written between 1956 and 1964 in Japan where he studied Zen at the monastery in Kyoto; "Kali"—poems inspired by a visit to India and his reading of Indian religious texts, particularly those of Shivaism and Tibetan Buddhism; and "Back"—poems done on his return to this country in 1964 which look again at our West with the eyes of India and Japan. The book concludes with a group of

Williams have shown a shattered social good poet can revitalize prose style. Earth House Hold (a play on the root meaning of "ecology"), drawn from Gary Snyder's essays and journals, may prove a landmark for the new generation. "As a poet," Snyder tells us, "I hold the most archaic values on earth. They go back to the late Paleolithic; the fertility of the soil, the magic of animals, the power-vision in solitude, the terrifying intuition and rebirth; the love and ecstasy of the dance, the common work of the tribe." He develops, as replacement for structures. a concept of tribal tradition which could lead to "growth and enlightenment in self-disciplined freedom. Whatever it is or ever was in any other culture can be reconstructed from the unconscious through meditation...the coming revolution will close the circle and link us in many ways with the most creative aspects of our archaic past."

How real is reality? Are our images of the world mere inventions, or does an external reality correspond

to them? Is it possible to know the truth? These are questions that physicist and philosopher Heinz von Foerster and journalist Bernhard Poerksen debate about in their conversations. Together, they explore the borders of our capacity for knowledge. They discuss the seeming objectivity of our sensual perception, the consequences of "truth terrorism" and the connections between knowledge and ethics, sight and insight.

A Libertarian Walks Into a Bear is the sometimes funny, sometimes terrifying tale of what happens when a government disappears into the woods. He is alone in the Canadian wilderness with nothing but his clothing, a tattered windbreaker, and the hatchet his mother had given him as a present. At first consumed by despair and self-pity, Brian slowly learns survival skills—how to make a shelter for himself, how to hunt and fish and forage for food, how to make a fire—and even finds the courage to start over from scratch when a tornado ravages his campsite. When Brian is finally rescued after fifty-four days in the wild, he emerges from his ordeal with new patience and maturity, and a greater understanding of himself and his

Until now, few investigators have turned their attention to the interpretive challenge posed by the presence of all the traditional lineages of Asian Buddhism in a consciously multicultural society. Nor have scholars considered the place of their own contributions as writers, teachers, and practising Buddhists in this unfolding saga. In thirteen chapters and a critical introduction to the field, the book treats issues such as Asian American Buddhist identity, the new Buddhism, Buddhism and American culture, and the scholar's place in American Buddhist Studies. The volume offers complete lists of dissertations and theses on American Buddhism and North American dissertations and theses on topics related to Buddhism since 1892.

Mountains and Rivers Without End The Practice of the Wild At a time of growing environmental crisis, a pioneer of Green Buddhist thought

offers challenging and illuminating perspectives. With species rapidly disappearing and global temperatures rising, there is more urgency than ever to act on the ecological crises we face. Hundreds of millions of people around the world—including unprecedented numbers of Westerners—now practice Buddhism. Can Buddhists be a critical voice in the green conversation? Leading Buddhist environmentalist Stephanie Kaza has spent her career exploring the intersection of religion and ecology. With so much at stake, she offers guidance on how people and communities can draw on Buddhist concepts and practices to live more sustainable lives
