We live in an era of nation-states. Nationhood is predicated on shared sense of past and a common purpose of future. More than nation-state, India is a civilization, a complete civilization. To keep this civilization

fresh and vibrant, winds from all directions are imperative for its nourishment. But, winds cannot be allowed to build into destructive storms, that threaten to uproot the civilization, the very basis of nationhood. Jihadism and Maoism are the two main destructive storms. Fueling these storms are India's enemies as well as the forces of proselytization. They have to be crushed both at ideological and physical levels. We have been squeamish in dealing with the problems because of the misplaced notion that all ideologies are basically benign and beneficial, they are not. 73 years of our post-independence experience is testimony. This misplaced notion has caused at least a lakh lives in Kashmir alone, resulting in ethnic cleansing of Hindus from the Valley by the jihadists. Sardar Patel did crush the communist revolt in Telangana, but in the following years due to subversion of our political class, it grew into the 'Red Corridor', i.e. from Tirupati to Pashupati. These forces have to be vanquished to secure the internal or the third front. This book 'Know the Anti-Nationals' exposes these enemies within.

Comprehensive Chemistry XI Arihant Publication India Limited

This book provides a comprehensive and balanced description of learning and teaching by connecting it to secondary and higher education teachers' experiences and practices in day-to-day life. Woven around research conducted by educationists, psychologists, and practitioners around the globe, this book presents key concepts and addresses significant discussions and concerns with regard to learning and teaching in the present age. Seeking to help teachers understand learners' learning needs, preferences, and styles and manage their teaching plans, priorities, and practices accordingly, it details the main ideas and emerging practices related to learning and teaching in a very easy to 'read, understand, and practice' way. The first five chapters approach learning from different perspectives, while the next six explain in detail how to practice teaching to maximize learning outcomes. Combining the traditional textbook-style approach of content description with a self-learning approach based on various real-world situations and activities related to both learning and teaching, this textbook is particularly valuable for teachers in school education, higher education, and teacher education. This book is also an essential resource for fulfilling teachers' continuing professional development requirements. Although intended for teachers worldwide, the book especially helps teachers in South Asian countries to improve learning outcomes in their classrooms and, subsequently, the quality of their education systems.
