LAI International is a premier provider of highly-engineered, mission-critical components since 1979. We help OEMs meet production goals by delivering high quality complex components on time, every time, at the right value.

The Pratt & Whitney J58 (company designation JT11D-20) was an American jet engine that powered the Lockheed A-12, and subsequently the YF-12 and the SR-71 aircraft. It was an afterburning turbojet with a unique compressor bleed to the afterburner which gave increased thrust at high speeds. Because of the wide speed range of the aircraft the engine needed two modes of operation to take it from ...

StandardAero > About Us

Barnes Aerospace provides superior manufacturing solutions and comprehensive component overhaul and repair services to the world's major turbine manufacturers, commercial airlines, and the military.. We set the industry standard, providing highly engineered machined and fabricated components and assemblies for aircraft engines and airframe

manufacturers and land-based industrial gas turbines.

Pratt & Whitney has actually been working on CMCs since the early 2000s. Many of these patents are for airfoils, but also for vanes, disks, hubs, rails, blade outer air seals (BOAS) and other turbine components as well as coatings. Note that these patents are assigned to United Technologies (UTC, Waltham, Mass., U.S.), which owned Pratt ...
