The field of historic preservation is becoming more socially and culturally inclusive, through more diversity in the profession and enhanced community engagement. Bringing together a broad range of practitioners, this book documents historic preservation's progress toward inclusivity and explores further steps to be taken.

From Colonization to Globalization in Taiwan Elsevier Health Sciences

Texts of the past were often not monolingual but were produced by and for people with bi- or multilingual repertoires; the communicative practices witnessed in them therefore reflect ongoing and earlier language contact situations. However, textbooks and earlier research tend to display a monolingual bias. This collected volume on multilingual practices in historical materials, including code-switching, highlights the importance of a multilingual approach.

The authors explore multilingualism in hitherto neglected genres, periods and areas, introduce new methods of locating and analysing multiple languages in various sources, and review terminology, theories and tools. The studies also revisit some of the issues already introduced in previous research, such as Latin interacting with European vernaculars and the complex relationship between code-switching and lexical borrowing. Collectively, the contributors show that multilingual practices share many of the same features regardless of time and place, and that one way or the other, all historical texts are multilingual. This book takes the next step in historical multilingualism studies by establishing the relevance of the multilingual approach to understanding language history. Second language assessment is ubiquitous. It has found its way from education into questions about access to professions and migration. This volume focuses on the main debates and research advances in second language assessment in the last fifty years or so, showing the influence of linguistics, politics, philosophy, psychology, sociology, and psychometrics. There are four parts which, when taken together, address the principles and practices of second language assessment while considering its impact on society. Read separately, each part addresses a different aspect of the field. Part I deals with the conceptual foundations of second language assessment with chapters on the purposes of assessment, and standards and frameworks, as well as matters of scoring, quality assurance, and test validation. Part II addresses the theory and practice of assessing different second language skills including aspects like intercultural competence and fluency. Part III examines the challenges and opportunities of second language assessment in a range of contexts. In addition to chapters on second language assessment on a national scale, there are chapters on learning-oriented assessment, as well as the uses of second language assessment in the workplace and for migration.

Part IV examines a selection of important issues in the field that deserve attention. These include the alignment of language examinations to external frameworks, the increasing use of technology to both deliver and score second language tests, the responsibilities associated with assessing test takers with special needs, the concept of 'voice' in second language assessment, and assessment literacy for teachers and other test and score users. *Cumulative listing* PRAXIS II Elementary Education Curriculum, Instruction, Assessment (0011)

This book presents intentional dynamics, which is a new perspective on TESOL contexts, activity and outcomes. The key innovation is a synthesis of complex systems and ecological theories, as well as the concept of intentionality from the philosophy of mind, to understand the psychological and social processes of TESOL. One aspect of intentional dynamics is the 'ordinary' intentions of individuals to perform particular actions, and of organisations to achieve planned outcomes. Another aspect is philosophically defined psychological and social forms of intentionality. Psychological intentionality is understood as what language learners' and teachers' (and other stakeholders') beliefs and emotions are 'about' or 'directed at'. Social intentionality is the 'aboutness' expressed by TESOL materials, curricula and policies. The book explores how intentional dynamics both emerge from and give shape to TESOL activity, and outlines what are the practical implications of intentional dynamics for TESOL learners, teachers, researchers, managers and policy-makers.

*Identity and Pragmatic Language Use* Walter de Gruyter GmbH & Co KG

This book is the first longitudinal study that addresses language policy and planning in the context of a major international sporting event and examines the ideological, political, social, cultural, and economic effects of such context-specific policy initiatives on contemporary China. The book has important reference value for future research on language

management at the supranational level and language services for linguistically complex events. At the same time, it presents some broader implications for current and future language policy makers, language educators and learners, particularly from non-English speaking backgrounds. Foreword by Ingrid Piller

This book is a timely response to a rather urgent call to seek an updated methodology in rereading and reappraising early Chinese texts in light of newly discovered early writings. For a long time, the concept of authorship in the formation and transmission of early Chinese texts has been misunderstood. The nominal author who should mainly function as a guide to text formation and interpretation is considered retrospectively as the originator and writer of the text. This book illustrates that although some notions about the text as the author's property began to appear in some Eastern Han texts, a strict correlation between the author and the text results from later conceptions of literary history. Before the

modern era, there existed a conceptual gap between an author and a writer. A pre-modern Chinese text could have had both an author and a writer, or even multiple authors and multiple writers. This work is the first study addressing these issues by more systematically emphasizing the connection of the text, the author, and the religious and sociopolitical settings in which these issues were embedded. It is expected to constitute a palpable contribution to Chinese studies and the discipline of philology in general

The New England Journal of Medicine R. R. Bowker

This new reader offers a collection of articles focusing on practicing anthropology at a time when readers are increasingly looking for ways to apply their anthropology degrees to their professional lives. This book gives a broad overview of the applied cultural anthropology field through contextualizing case studies that cover important issues (roles, ethics, methods, policy) as well as domains of practice (urban, medical, development, the environment, education, and business). The first half of the reader highlights key issues: The role of applied anthropology in society, ethical dilemmas, special research methods, and public policy implications for applied anthropology. The second half of the reader covers different applied career domains or specialization within applied anthropology including urban, medical, developmental, educational, and corporate career options. For those interested in anthropology.

In legal interpretation, where does meaning come from? Law is made from language, yet law, unlike other language-related disciplines, has not so far experienced its "pragmatic turn" towards inference and the construction of meaning. This book investigates to what extent a pragmatically based view of linguistic and legal interpretation can lead to new theoretical views for law and, in addition, to practical consequences in legal decision-making. With its traditional emphasis on the letter of the law and the immutable stability of a text as legal foundation, law has been slow to take the pragmatic perspective: namely, the language-user's experience and activity in making meaning. More accustomed to literal than to pragmatic notions of meaning, that is, in the text rather than constructed by speakers and hearers the disciplines of law may be culturally resistant to the pragmatic turn. By bringing

together the different but complementary perspectives of pragmatists and lawyers, this book addresses the issue of to what extent legal meaning can be productively analysed as deriving from resources beyond the text, beyond the letter of the law. This collection re-visits the feasibility of the notion of literal meaning for legal interpretation and, at the same time, the feasibility of pragmatic meaning for law. Can explications of pragmatic meaning support court actions in the same way concepts of literal meaning have traditionally supported statutory interpretations and court judgements? What are the consequences of a user-based view of language for the law, in both its practices of interpretation and its definition of itself as a field? Readers will find in this collection means of approaching such questions, and promising routes for inquiry into the genre- and field-specific characteristics of inference in law. In many respects, the problem of literal vs. pragmatic meaning confined to the text vs. reaching beyond it will appear to parallel the dichotomy in law between textualism and intentionalism. There are indeed illuminating connections between the pair of linguistic terms and the more publicly controversial legal ones. But the parallel is not exact, and the linguistic dichotomy is in any case anterior to the legal one. Even as linguistic-pragmatic investigation may serve legal domains, the legal questions themselves point back to central conditions of all linguistic meaning.

*Education In The Elementary School (1-8)* Walter de Gruyter GmbH & Co KG

This book investigates formal characteristics and discourse functions of linguistic creativity at the level of idioms in spoken ELF as represented in the Vienna-Oxford International Corpus of English (VOICE). Building on the findings of previous ELF research, the book proposes that creativity might serve as a fundamental concept in accounting for the variation that seems to be central to describing and understanding English as a lingua franca.

**Language, Society, and the State** Walter de Gruyter GmbH & Co KG

Using Taiwan as a case study, this book constructs an innovative theory of a political sociology of language. Through documentary and ethnographic data and a comparative-historical method the book illustrates how language mediates interactions between society and the state and becomes politicized as a result; how language, politics and power are intertwined processes; and how these processes are not isolated in institutions but socially embedded.

With a unique focus on the most effective interventional

techniques, Withrow & MacEwen's Small Animal Clinical Oncology, 5th Edition tells the full story of cancer in dogs and cats — what it is, how to diagnose it, and how to treat many of the most common cancers encountered in clinical practice. Nearly 500 color photographs, diagrams, x-rays, and gross views depict the clinical manifestations of various cancers. This edition covers the latest advances in clinical oncology, including chemotherapy, surgical oncology, and diagnostic techniques. With contributions from 65 veterinary oncology experts, this authoritative reference is a must-have for current, evidence-based therapeutic strategies on canine and feline oncology. "I really love this book. If you are interested in veterinary oncology, have a flick through this book online or at a conference when you get the chance. I hope that you agree with me that this is the definitive oncology reference source for the early 21st century and that you feel compelled to buy it. Your patients will thank you for it."

Reviewed by: Gerry Polton MA VetMB MSc(Clin Onc) DipECVIM-CA(Onc) MRCVS, UK Date: July 2014 Cutting-edge information on the complications of cancer, pain management, and the latest treatment modalities prepares you to diagnose and treat pets with cancer rather than refer cases to a specialist. A consistent format for chapters on body system tumors includes coverage of incidence and risk factors, pathology, natural behavior of tumors, history and clinical signs, diagnostic techniques and workup, treatment options, and prognosis for specific malignancies. A systems approach to the diagnosis and management of cancer facilitates access to information about the many malignancies affecting small animal patients. Nearly 500 color images provide accurate depictions of specific diseases and procedures. Helpful drug formularies provide quick access to information on indications, toxicities, and recommended dosages for chemotherapeutic and analgesic drugs used in cancer treatment. Expert contributors provide in-depth coverage of the most current information in his or her respective specialty in veterinary oncology. Chemotherapy protocols are included when case studies prove clinical efficacy. Discussion of compassion and supportive care for the management of pain, nutritional needs, and grief includes

methods for handling the pet's pain and nutritional complications as well as the pet owner's grief when treatment is not successful. Thoroughly UPDATED chapters cover the most recent changes in the clinical management of melanoma, mast cell tumors, tumors of the skeletal system, tumors of the endocrine system, tumors of the mammary gland, urinary cancers, nervous system cancers, lymphoma, and histiocytic diseases. NEW Clinical Trials and Developmental Therapeutics chapter discusses the various phases of clinical trials as well as current challenges and opportunities in oncology drug development. NEW! A focus on the best recommended treatment options highlights therapeutic strategies that have been vetted by veterinary oncology experts. NEW co-author Dr. Rodney L. Page adds his valuable perspective, expertise, and research experience.

**The Pragmatic Turn in Law** Research & Education Assn  
ELF (English as a lingua franca) research counters the monocentric view of English based on norms of native speakers of English, and supports any usages reflecting sociopragmatic and pragmalinguistic reality of ELF communication. Such an approach empowers any speakers of English to contemplate their own varieties of English as legitimate, providing them greater options for positive self-identification. Based on qualitative and interpretive methodology, this book illustrates how Japanese L2 English users establish identities related to L2 English as part of their multiple identities, and how they explore new identity options through ELF. Moreover, the author demonstrates how power relations relating to English language are constructed through the participants' experiences in ELF interactions. Also, analysis of the data reveals that to what degree the Japanese L2 English users wish to affiliate with particular groups in ELF interactions with people from diverse cultural background. Because of the multidisciplinary nature of the study, this book will appeal to a broad audience such as scholars and students who are interested in further understanding of identity and sociocultural issues involved in intercultural communication.
