Literary Praxis: A Conversational Inquiry into the Teaching of Literature explores the teaching of literature in secondary schools. It does this from the vantage point of educators in a range of settings around the world, as they engage in dialogue with one another in order to capture the nature of their

professional commitment, the knowledge they bring to their work as literature teachers, and the challenges of their professional practice as they interact with their students. The core of the book comprises accounts of their day-to-day teaching by Dutch and Australian educators. These teachers do more than capture the immediacy of the here-and-now of their classrooms; they attempt to understand those classrooms relationally, exploring the ways in which their professional practice is mediated by government policies, national literary traditions and existing traditions of curriculum and pedagogy. They thereby enact a form of literary ‘ praxis ’ that grapples with major ideological

issues, most notably the impact of standards-based reforms on their work. Educators from other countries then comment on the cases written by the Dutch and Australian teachers, thus taking the concept of ‘ praxis ’ to a new level, as part of a comparative inquiry that acknowledges the richly specific character of the cases and resists viewing teaching around the world as though it lends itself unproblematically to the same standards of measurement (as in the fetish made of PISA). They step back from a judgmental stance, and try to understand what it means to teach literature in other educational settings than their own. The essays in this collection show the complexities of literature teaching

as a form of professional praxis, exploring the intensely reflexive learning in which teachers engage, as they induct their students into reading literary texts, and reflect on the socio-cultural contexts of their work.

Issues in Materials

Development provides readers with theoretical foundations and practical aspects of designing materials for EFL/ESL contexts. It starts with discussing some basic and preliminary principles of

materials design followed by scrutinizing critical issues in materials development in an objective and systematic way. This ranges from considering learners' needs, adopting, adapting, selection, and gradation of materials to the specific focus of the book on developing various types of materials for the four language skills, pronunciation, ESP vocabulary, and computer assisted language learning materials. Authenticity of materials to be designed and the inclusion of affective

factors to develop motivating materials to engage language learners, in addition to features of materials design at a universal level are other areas to read about. This book finally tries to open new horizons and possible futuristic approaches to improve today's ELT materials.

principles based on theory, and innovative concepts, approaches, and practices illustrated through concrete examples, for promoting social justice and developing a critical praxis in foreign language classrooms in the U.S. and in wider world language communities. For educators seeking to translate these ideals into classroom practice in an environment dominated by the	current standards movement and accountability measures, the critical insights on language education offered in this text will be widely welcomed. The text is designed as a sourcebook for translating theory into practice. Each chapter includes the theoretical base, guidelines for practice, discussion of the relationship to existing practices in the world language	classroom, suggestions for activity development (which can be integrated into a professional portfolio), illustrative examples, questions for reflection, and additional suggested readings. Teaching World Languages for Social Justice is a primary or supplementary text for second and foreign language teaching methods courses and is equally appropriate for graduate courses in

Paulo Freire's critical pedagogy has had a profound influence on contemporary progressive

educators around the globe as they endeavor to rethink education for liberation and the creation of more humane global society. For Freire, maintaining a sense of historicity, that is, the origins from which our thinking and practice emerges, is essential to understanding and practicing education as a means for liberation. Too often, however, critical pedagogy is presented as a monolithic philosophy, and the historical and intellectual roots of critical pedagogy are submerged. Through a

compilation of essays written by leading and emerging scholars of critical pedagogy, this text brings history into the present and keeps Paulo's intellectual roots alive in all of us as we develop our praxis today.

Perspectives and identity are typically reinforced at a young

age, giving teachers the responsibility of selecting reading material that could potentially change how the child sees the world. This is the importance of sharing diverse literature with today's children and young adults, which introduces them to texts that deal with religion, gender identities, racial identities, socioeconomic conditions, etc. Teachers and librarians play significant roles in placing diverse books in the hands of young readers. However, to achieve the goal of increasing young people's access to diverse books, educators and librarians must receive quality instruction on this topic within their university preparation programs. The Handbook of

Research on Teaching Diverse Youth Literature to Pre-Service Professionals is a comprehensive reference source that curates promising practices that teachers and librarians are currently applying to prepare aspiring teachers and librarians for sharing and teaching diverse youth literature. Given the importance of sharing diverse books with today's young people, university educators must be aware of engaging and effective methods for teaching diverse literature to pre-service teachers and librarians. Covering topics such as syllabus development, diversity, social justice, and activity planning, this text is essential for university-level teacher educators,

library educators who prepare pre-service teachers and librarians, university educators, faculty, adjunct instructors, researchers, and students.

The issue of social justice has been brought to the forefront of society within recent years, and educational institutions have become an integral part of this critical conversation.

Classroom settings are expected to take part in the promotion of inclusive

practices and the development of culturally proficient environments that provide equal and effective education for all students regardless of race, gender, socio-economic status, and disability, as well as from all walks of life. The scope of these practices finds itself rooted in curriculum, teacher preparation, teaching practices, and pedagogy in all educational environments.

Diversity within school administrations, teachers, and students has led to the need for socially just practices to become the norm for the progression and advancement

of education worldwide. In a modern society that is fighting for the equal treatment of all individuals, the classroom must be a topic of discussion as it stands as a root of the problem and can be a major step in the right direction moving forward. Research Anthology on Instilling Social Justice in the Classroom is a comprehensive reference source that provides an overview of social justice and its role in education ranging from concepts and theories for inclusivity, tools, and technologies for teaching diverse students, and the implications of having

culturally competent and diverse academicians, and students in classrooms. The chapters dive deeper into the curriculum choices, teaching theories, and student experience as teachers strive to instill social justice learning methods within their classrooms. These topics span a wide range of subjects from STEM to language arts, and within all types of climates: PK-12, higher education, online or in-person instruction, and classrooms across the globe. This book is ideal for in-service and preservice teachers, administrators, social justice researchers, practitioners, stakeholders, researchers,

interested in how social justice is currently being implemented in all aspects of education.

One of the most influential critical educators of the twentieth century, Paulo Freire challenged those educational inequalities and conditions of injustice faced by oppressed populations. In this new edition of *Reinventing Paulo Freire*, Antonia Darder re-examines his legacy through reflections on Freirean pedagogy and the narratives of teachers who reinvent his work. The fully revised first part provides important historical, political, and

economic connections between major societal concerns and educational questions raised by Freire and their link to the contemporary moment, including questions tied to neoliberalism, coloniality, and educational inequalities. At the heart of the book is a critical understanding of how Freire's pedagogy of love can inform, in theory and practice, a humanizing approach to teaching and learning. Powerful teacher narratives offer examples of a living praxis, committed to democratic classroom life and the emancipation of subaltern communities. The narratives clearly illustrate how Freire's ideas can be put concretely into practice in schools and

communities. These reflections on Freirean praxis are sure to spark conversation and inspiration in teacher education courses. Through a close theoretical engagement of Freire's ideas and key insights garnered from lived experiences, the book speaks to the ways Freire can still inspire contemporary educators to adopt the spirit of liberatory pedagogy. By so doing, *Reinventing Paulo Freire* is certain to advance his theories in new ways, both to those familiar with his work and to those studying Freire for the first time.

Literacy Across the Community IAP

"This volume explores and evaluates community-based literacy programs, examining how they bridge gaps in literacy development, promote dialogue, and connect families, communities, and schools. Highlighting the

diversity of existing literary initiatives across populations, this book brings together innovative and emerging scholarship on the relationship between P20 schools and community-based literacy programming. This volume not only identifies trends in research and practice, but it also addresses the challenges affecting these community-based programs and presents the best practices that emerge from them. Collaborating with leading scholars to provide national and

international perspectives, and offering a clear, birds-eye view of the state of community literacy praxis, chapters cover programming in a multitude of settings and for a wide range of learners, from early childhood to incarcerated youths and adults, and including immigrants, refugees, and indigenous communities. Topics include identity and empowerment, language and literacy development across the lifespan, rural and urban environments, and partnership programs. The

breadth of community literacy programming gathered in a single volume represents a unique array of models and topics, and has relevance for researchers, scholars, graduate students, pre-service educators, and community educators in literacy"--

The Changing Landscape of Spanish Language Curricula
Springer

Explicating clearly and concisely the full implication of a praxis-oriented language pedagogy, this book argues for an approach to language teaching grounded in a significant scientific theory of human learning—a stance that rejects the consumer approach to theory and the dichotomy between theory and practice that dominates SLA and language teaching. This approach is based on Vygotsky's sociocultural theory, according to which the two activities are inherently connected so that each is

necessarily rooted in the other; practice is the research laboratory where the theory is tested. From the perspective of language education, this is what is meant by the 'pedagogical imperative.' Sociocultural Theory and the Pedagogical Imperative in L2 Education • Elaborates a new approach to dealing with the relationship between theory and practice—an approach grounded in thinking about Vygotskian praxis—the dialectical unity of theory and practice • Presents an analysis of empirical research illustrating praxis-based principles in real language classrooms • Brings together cognitive linguistics and sociocultural theory • the former provides the theoretical knowledge of language

required of praxis and the latter furnishes the theoretical principles of learning and development also called for in a praxis approach • Offers recommendations for redesigning teacher education programs Its timely focus on the theory-practice gap in language education and its original approach to bridging it put this book at the cutting edge of thinking about Vygotskian sociocultural theory in applied linguistics and SLA.
