It can be used as a self-study course – you do not need to work with a Math tutor. (It can also be used with a Math tutor) Ideal for self-study as well as for classroom usage. Get ready for the Pre-Algebra Exam with a PERFECT Prep Book! Published By: Effortless Math Education www.EffortlessMath.com Pre-Algebra Demystified Mark Twain Media As in previous editions, the focus in PREALGEBRA
---	---	---

remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies. For the first time in this edition, How To examples appear before the paired Examples and You Try It problems—a hallmark feature found in all other books in the Aufmann series. Presenting students with worked examples, and then providing them with the opportunity to immediately solve similar problems, helps them build their confidence

and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear, objective-based approach allows students to organize their thoughts around the content, and supports instructors as they

work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Sixth Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow. Available with InfoTrac Student Collections

<http://gocengage.com/infotracs> Prep book with hundreds of examples, and abundant Pre-Algebra questions is all you will ever need to fully prepare for the Pre-Algebra course. Effortless Math unique study program provides you with an in-depth focus on the Pre-Algebra concepts, helping you master the math skills that students find the most troublesome. This Pre-Algebra preparation book contains most common sample questions that are most likely to appear in the Pre-Algebra test. Inside the pages of this comprehensive Pre-Algebra book, students can learn basic math operations in a structured manner with a complete study program to help them understand essential math skills. It also has many exciting features, including: Content 100% aligned with the 2020 Pre-Algebra test Written by Algebra instructors and test experts Complete coverage of all Pre-Algebra concepts and topics which you will be tested Over 2,500 additional Pre-Algebra practice questions in both multiple-choice and grid-in formats with answers grouped by topic, so you can focus on your weak areas Abundant Math skill building exercises to help test-takers

A Comprehensive Review and Step-by-Step Guide to Mastering

Pre-Algebra Cengage Learning

When not used on a daily basis, basic math concepts are difficult to recall and use. When people plan to return to school, they must take entrance and placement exams with a significant math portion. Idiot's Guides: Basic Math and Pre-Algebra helps readers get back up to speed and relearn the primary concepts of mathematics, geometry, and pre-algebra so that they can pass entrance exams, such as the GED, ASVAB, and Praxis, as well as remedial math courses. Ideal for both students and parents, Idiot's Guides: Basic Math and Pre-Algebra will include a workbook component with practice problems to help reinforce the

math concepts. In this book, readers get: - An introduction to positive and negative numbers and place values - A solid review of the four basic math operations: addition, subtraction, multiplication, and division - Step-by-step guidance on how to understand and solve word problems - An explanation of the concepts of factors and multiples - Help in working with fractions, decimals, and percents - The basics of geometry - Weights, measures, and other practical applications of mathematics - How to create and interpret mathematical graphs - A grounding in statistics and probability - An introduction to algebraic concepts and problems,

including expressions and
equations
