Rhythms of Grace is a unique, innovative and cutting-edge program resource designed to meet the spiritual needs of children and families living with autism-spectrum disorders. Participant families gather monthly with program leaders and volunteers for sessions that are a hybrid of worship and faith formation. This bookhelps children and their families feel at the center of a worship/formation experience that is specific to their needs and circumstances, rather than merely at the margins of even a conventionally inclusive program of worship or faith formation. The whole Rhythms of Grace curriculum consists of a 3-year syllabus of distinct scripture-based session plans. This volume, Year 1, includes complete plans for 12 monthly sessions and 6 feast sessions, as well as the background and support material needed to establish and conduct a successful program.

From the formation of the Universe to today, countless major events have changed the course of life on Earth. Aligned with the online Big History Project supported by Bill Gates, Big History puts a wide-angle lens on 13.8 billion years of remarkable history and shows you how and why we got where we are today. With stunning visual timelines and special CGI reconstructions, you can see history's greatest events. Look back to our origins in the stars, explore everything from the birth of the Sun to modern technology, and see what the future holds for humans. Weaving together multiple disciplines including physics and sociology, and with a foreword by TED speaker Professor David Christian, Big History is a truly unique look at the history of the world.

**The Romance of Construction - I** UNSW Press

A compelling history of seashells and the animals that make them, revealing what they have to tell us about nature, our changing oceans, and ourselves. Seashells have been the most coveted and collected of nature's creations since the dawn of humanity. They were money before coins, jewelry before gems, art before canvas. In *The Sound of the Sea*, acclaimed environmental author Cynthia Barnett blends cultural history and science to trace our long love affair with seashells and the hidden lives of the mollusks that make them. Spiraling out from the great cities of shell that once rose in North America to the warming waters of the Maldives and the slave castles of Ghana, Barnett has created an unforgettable account of the world's most iconic seashells. She begins with their childhood wonder, unwinds surprising histories like the origin of Shell Oil as a family business importing exotic shells, and charts what shells and the soft animals that build them are telling scientists about our warming, acidifying seas. From the eerie calls of early shell trumpets to the evolutionary miracle of spines and spires and the modern science of carbon capture inspired by shell, Barnett circles to her central point of listening to nature's wisdom—and acting on what seashells have to say about taking care of each other and our world.

Revealing the diversity of Aboriginal life in the Sydney region, this study examines a variety of source documents that discuss not only Aboriginal life before colonization in 1788 but also the early years of first contact. This is the only work to explore the minutiae of Sydney Aboriginal daily life, detailing the food they ate; the tools, weapons, and equipment they used; and the beliefs, ceremonial life, and rituals they practiced. This updated edition has been revised to include recent discoveries and the analyses of the past seven years, adding yet more value to this 2004 winner of the John Mulvaney award for best archaeology book from the Australian Archaeological Association. The inclusion of a special supplement that details the important sites in the Sydney region and how to access them makes the book especially appealing to those interested in visiting the sites.

**Investigating the Archaeological and Historical Records** Cambridge University Press

Later prehistoric settlement in Cornwall and the Isles of Scilly reports on the excavation between 1996 and 2014 of five later prehistoric and Roman period settlements. All the sites were multi-phased, revealing similar and contrasting occupational patterns stretching from the Bronze Age into the Iron Age and beyond.

*Including a New Translation of the Flood Story* Courier Corporation

This introduction to the art of tribal peoples of North America, Africa, and the South Pacific does not briefly cover the hundreds of artistic traditions in these three vast areas but rather studies in depth thirty-six art styles within all three areas using the methods of art history, including stylistic analysis and iconographic interpretation. Emphasis is on the art in cultural context and as a system of visual communication within each tribal area. Where appropriate for a more complete understanding of the art, data from archaeology, ethnology, linguistics, religion, and other humanistic disciplines are included. Among the peoples and cultures whose art is studied are the Haida, Kwakiutl, and Tlingit; the Hohokam and Mongollon, the Anasazi and Hopi; the Dogon and Bamana of Mali; the Asante of Ghana; the Benin, Yoruba, and Ibo of Nigeria; the Fan, the Bamum, and the Kuba of Central Africa; Australian aboriginal and Island New Guinea art; Island Melanesia art; central and eastern Polynesia; Hawaii and the Maori in Marginal Polynesia. The format of the text and selected illustrations is based on seventeen years of teaching African, North American Indian, and South Pacific art to undergraduate and graduate students at Herbert H. Lehman College (CUNY), New York University, and Columbia University. The book is intended for art history and anthropology students and the interested lay reader or collector. The detailed notes at the end of the book are for further study, research, and understanding of the tribal art style under discussion.

*Patents* CRC Press

This book integrates a region-wide chronological narrative of the archaeology of Pacific Oceania. How and why did this vast sea of islands, covering nearly one-third of the world's surface, come to be inhabited over the last several millennia, transcending significant change in ecology, demography, and society? What can any or all of the thousands of islands offer as ideal model systems toward comprehending globally significant issues of human-environment relations and coping with changing circumstances of natural and cultural history? A new synthesis of Pacific Oceanic archaeology addresses these questions, based largely on the author's investigations throughout the diverse region.

*The Epic of Gilgamesh: Selected Readings from its Original Early Arabic Language* Routledge

Provides templates and step-by-step instructions for creating twenty-seven mosaic works of art using found and second-hand objects.

*Jan Brett Literature Activities--The Owl and the Pussycat* Gryphon House, Inc.

The pioneering work presented in this book introduces the earliest known literary and mythology work in the world, the Epic of Gilgamesh, in its actual language: early Classical Arabic. It provides a more accurate translation and understanding of the important story of the flood, one of the key stories of the monotheistic religions. In this book, the author, a known Arabic type designer and an independent scholar of Nabataean, Musnad, and early Arabic scripts, was able to decipher the actual meanings and pronunciations of several important names of ancient Mesopotamian gods, persons, cities, mountains, and other entities. He was able to uncover the evolution path of the concept of god and the background themes behind the rise of the monotheistic religions. Utilizing a generous text sample from the Akkadian and Sumerian languages, this book is an excellent reference textbook for scholars and students of Arabic and Assyriology who are interested in translating these ancient languages through both, the historical Arabic etymological references and the deciphering tools of Assyriology. To illustrate his breakthrough Arabic-based deciphering methodology, the author used a sample text consisting of more than 900 lines from three tablets of the Standard and Old Babylonian editions of the Epic of Gilgamesh. By "digging out" the actual language of the epic, he was not only able to resurrect the actual word soundings and linguistic literary style of its original text, but also to provide more accurate and coherent translations. Following his three years of research, he was able to demonstrate through undisputed linguistic evidence that the epic was in fact written in a beautiful, powerful early Classical Arabic language! And the so-called Sumerian and Akkadian languages that the epic was recorded with, which we are told today are unrelated languages, were in fact one evolving early Arabic language, written with one evolving writing system, passing through two major time periods. Although this book is primarily written as a reference textbook for scholars, it is equally suitable for anyone interested in reading the translation of the Epic of Gilgamesh, a fascinating Mesopotamian Arab mythology work documenting eloquently some of the most important and lasting ancient myths invented by humankind.

"Early themes - places is one of a new series of teacher resource books designed to support teachers as they impart knowledge about commonly-taught themes in early childhood classrooms. The books contain a variety of ideas for using the themes to assist teachers as they convey early skills and concepts using cross-curricular activities in learning centres or whole class activities." --p. iii.

*Inhabiting a Sea of Islands* Pen and Sword Maritime

World-wide maritime trade has been the essential driver of wealth-creation, economic progress and global human contact. Trade and exchange of ideas have been at

---

the heart of economic, social, political, cultural and religious life and maritime international law. These claims are borne out by the history of maritime trade beginning in the Indian Ocean and connecting to Southeast Asia, Japan, the Americas, East Africa, the Middle East especially the Persian Gulf, the Mediterranean and Europe. This development predates the end of the Ice Age with worldwide flooding and stimulated the establishment of land-based civilizations in the above regions with particular effect on the Greek and Roman empires and even China's 'Celestial' empire. The Indian subcontinent was the original major player in maritime trade, linking oceans and regions. Global maritime trade declined with the fall of Mediterranean empires and the 'dark age' in Europe but revived with Indian Ocean and Asian maritime networks. Shipping and trade studies are hugely practical but can be technical, legalistic and even dull for non-specialists. But this history is a broadly based and exciting account of human interaction at multiple levels, for general readers, specialists and practitioners. It is based on huge reading and rare sources and with an attractive writing style, and full of fascinating sidelights illuminating the historical narrative - and from an author with lifelong experience in international shipping.
