helps people plan their college education and better make the decision to transfer between schools. Everyone seeking a college education--from older non-traditional students, to high school graduates--can benefit from the information in this book. In today's world most college students do not stay at one institution for their entire education. Transferring for better programs, better prices, and better living arrangements is becoming much more common. The transfer system and how it can benefit the average person is described here. Available scholarships, housing requirements, tuition prices, and how credits transfer are discussed in great detail.	rapidly growing ODsonFinance Facebook community of Optometrists and companion website, Co-founders Drs. Dat Bui and Aaron Neufeld created this comprehensive blueprint on techniques to overcome financial obstacles facing optometry students, residents, practicing doctors and other high-earning professionals. This book strives to teach both young and experienced optometrists financial topics that were never taught in school, ranging from strategies on how to use a high-income salary to attack massive student debt, budgeting and saving for retirement, avoiding predatory advice from financial advisers, using tax strategies to save money, creating passive income, stepping into private practice

Jessica Kingsley Publishers
How to achieve perfect vision naturally through proven eye-training methods • Explains how vision problems are related to imbalances in the internal organs • Provides Taoist and Ayurvedic practices for harmonizing the liver and kidneys, the organs directly associated with eye problems In the West, problems with eyesight are treated separately from overall health, usually with prescription glasses or contact lenses. But Eastern systems of holistic healing view the eyes as mirrors of physical health. Eye problems reflect problems with the internal organs, most specifically the liver and kidneys. The Art of Cosmic Vision offers Taoist healing sound exercises for strengthening the liver and kidneys as well as seven

internal Chi Kung exercises and Dao-Yin self-massage practices for toning the organ meridians. It also provides extensive dietary recommendations, including a complete Ayurvedic analysis of the three main nutritional body types. The wide variety of eye-strengthening exercises in The Art of Cosmic Vision includes the Egyptian Black Dot technique, the Taoist Long Swing technique, the Tai Chi Rocker Eye technique, and relaxing Yoga Eye Palming techniques. Rather than viewing the ciliary muscle within the eye as the only muscle responsible for focus, these exercises improve focus by training all of the muscles surrounding the eyes. With attention to improved diet, physical exercise, and these proven eye-training techniques, readers can restore their vision to vibrant

health.
