Now, we've learned a lot

and have established that this is not a passing thing – the use of precast elements in bridge construction is a new paradigm.” Specifically, Oliva said WisDOT is able to simplify and standardize the types of elements needed in bridge construction and is reaching out to contractors and the precast industry to share what’s been learned.

iraj.in STUDY OF PRECAST CONSTRUCTION

Precast concrete is a construction product produced by casting concrete in a reusable

mold or "form" which is then cured in a controlled environment, transported to the construction site and lifted into place. In contrast, standard concrete is poured into site-specific forms and cured on site. Precast stone is distinguished from precast concrete using a fine aggregate in the mixture, so the final product approaches the appearance of naturally occurring rock or stone.
