This laboratory manual is designed for an introductory majors biology course with a broad survey of basic laboratory techniques. The experiments and procedures are simple, safe, easy to perform, and especially appropriate for large classes. Few experiments require a second class-meeting to complete the procedure. Each exercise includes many photographs,

traditional topics, and experiments that help students learn about life. Procedures within each exercise are numerous and discrete so that an exercise can be tailored to the needs of the students, the style of the instructor, and the facilities available.

The Laboratory Manual for General, Organic, and Biological Chemistry, third edition, by Karen C. Timberlake contains 35 experiments related to the content of general, organic, and biological chemistry courses, as well as basic/preparatory chemistry courses. The labs included give students an opportunity to go beyond the lectures and words in the textbook to experience the scientific process from which conclusions and theories are drawn.

Prentice Hall Biology Prentice Hall

This self-guided introductory biology lab manual features a full range of activities that show how basic biological concepts can be applied to a wide variety of plants, animals, and microorganisms. It is designed to help readers (including those who are academically underprepared) acquire the basic knowledge needed to make informed decisions about biological questions that arise in everyday life, develop the problem-solving skills that will lead to success in a competitive job market, and learn to work effectively and productively as a member of a

team. Focuses on the scientific method -- requiring readers to develop hypotheses, set up experiments, collect data, record their data in graphs and charts, and draw conclusions from their experimental results. Offers opportunities to transfer content knowledge to real life applications through questions interwoven into each activity. Each laboratory includes a brief discussion of background information, hints for solving problems, important safety information, Comprehension Checks and Self Tests (with answers). For anyone beginning a study of biology, including those who are academically underprepared or from an ESL background.

Biology, the Living World Prentice Hall Careful observation and critical thinking are emphasized in this laboratory manual designed for majors and non-majors. The 18 exercises are appropriate for the introductory biology lab lasting two semesters. Nearly 100 full-color photos have been taken directly from slides and specimens. The color photos enable students to more readily identify structures and organisms studied in the lab. The

authors of this lab manual use the textbook, *Biology: Life on Earth* by Audesirk and Audesirk. The publisher is Prentice-Hall. Other special features include: -- Specific objectives at the beginning of each exercise to help students know what they are expected to accomplish -- Numerous illustrations to clarify instructions and procedures -- Frog dissection for study of vertebrate body systems and anatomy -- Drawings related to the circulatory system in color to clearly identify arteries and veins -- Space for student responses and observations throughout the manual -- Thoroughly class-tested exercises -- Appropriate for use with most textbooks
