Life Prentice Hall Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make

informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, **Concepts of Biology** is grounded on an evolutionary basis and includes

exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of **Concepts of Biology** is that instructors can customize the book, adapting it to the approach that works best in their

classroom.

Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Biology Prentice Hall
Authors Kenneth Miller and Joseph Levine continue to set the standard for clear, accessible writing and up-to-date content that engages student interest. Prentice Hall Biology utilizes a student-friendly approach that provides a powerful

framework for connecting the key concepts a biology. Students explore concepts through engaging narrative, frequent use of analogies, familiar examples, and clear and instructional graphics. Whether using the text alone or in tandem with exceptional ancillaries and technology, teachers can meet the needs of every student at every learning level.

For non-majors/mixed biology courses. The most comprehensive coverage at the most affordable price for non-majors biology. With a proven and effective tradition of engaging readers with real-world applications, high-

interest case studies, and inquiry-based pedagogy, *Biology: Life on Earth* fosters discovery and scientific understanding that students can use throughout their lives. Engaging Case Studies throughout each chapter and thoughtful pedagogy help students develop critical thinking and scientific literacy skills. The 12th Edition offers the most comprehensive coverage at the most affordable price for the non-majors biology student. This loose-leaf edition maintains its conversational, question-and-answer presentation style that has made it a best-seller. The new edition expands its focus on the process of science with new

Doing Science boxes throughout the text that walk students through the scientific process, and interactive Doing Science coaching activities in *Mastering Biology*. The text also provides Think Deeper questions that give instructors guidance for starting classroom discussions that promote critical thinking. For coverage of plant and animal anatomy & physiology, an alternate edition, *Biology: Life on Earth with Physiology*, 12th Edition, is also available. Also available as a Pearson eText or packaged with *Mastering Biology*: Pearson eText is a simple-to-use, mobile-optimized, personalized reading

experience that can be adopted on its own as the main course material. It lets students highlight, take notes, and review key vocabulary all in one place, even when offline. Seamlessly integrated videos and other rich media engage students and give them access to the help they need, when they need it. Educators can easily share their own notes with students so they see the connection between their eText and what they learn in class - motivating them to keep reading, and keep learning. What happens when you have more “hot” questions on the Bible and creationism than you can answer in one book? You create a second volume! The New Answers Book 2 explores over 30 exciting and faith-affirming topics, including: The fall of Lucifer and the origin of evil When does life begin (and why does it matter)? Is evolution a religion (and why should I care)? Archaeology, Egyptian Chronology, and the great flood Could early biblical figures like Noah really live to over 900 years of age? What was the Star of Bethlehem (and how did the wise men follow it)? The “Evolutionization” of our culture — including intelligent design, gay marriage,

Hollywood movies, and more! Explore these and other topics, answered biblically and logically in this book from the world’s largest apologetics ministry, Answers in Genesis. Contributors include Ken Ham, Dr. Andrew Snelling, Dr. Jason Lisle, Dr. Elizabeth Mitchell, Dr. Danny Faulkner, Mike Riddle, and more.
