 "This book offers a unique interpretation of traditional workshop instruction by showing teachers how to integrate their separate reading and writing workshops into one 'literacy workshop' (periodically and as dictated by student needs) that takes

---

advantage of the inherent reciprocity between reading and writing. Through narrative discussion, student samples, photographs, instructional resources, online content, suggested lessons and various mentor texts, the book explains the structure of the literacy workshop, tells readers how to get started with it, and shows them how to decide when it's best to merge the two workshops into one. The book is divided into two parts. Part I (Chapters 1-4) lays the foundation and gives the nuts and bolts of literacy workshop. Part II (Chapters 5-9) includes engagement/strategy/topic focused demonstration lessons - which includes a primary and an intermediate level example lesson for each Big Idea"--

"The Prentice Hall Choices in Literature is a balanced, integrated approach to language arts. Using literature as a base, the program develops students' capacities to read, write, speak, and listen, and helps them to connect literature to other content areas. At the same time, it fosters habits of critical thinking, aesthetic appreciation, and cooperative interaction."--Page T13

Alfred C. Kinsey's revolutionary studies of human sexual behavior are world-renowned. His meticulous methods of data collection, from

---

comprehensive entomological assemblies to personal sex history interviews, raised the bar for empirical evidence to an entirely new level. In <i>The Classification of Sex</i> , Donna J. Drucker presents an original analysis of Kinsey's scientific career in order to uncover the roots of his research methods. She describes how his enduring interest as an entomologist and biologist in the compilation and organization of mass data sets structured each of his classification projects. As Drucker shows, Kinsey's lifelong mission was to find scientific truth in numbers and through observation—and to record without prejudice in the spirit of a true taxonomist. Kinsey's doctoral work	included extensive research of the gall wasp, where he gathered and recorded variations in over six million specimens. His classification and reclassification of <i>Cynips</i> led to the speciation of the genus that remains today. During his graduate training, Kinsey developed a strong interest in evolution and the links between entomological and human behavior studies. In 1920, he joined Indiana University as a professor in zoology, and soon published an introductory text on biology, followed by a coauthored field guide to edible wild plants. In 1938, Kinsey began teaching a noncredit course on marriage, where he openly

discussed sexual behavior and espoused equal opportunity for orgasmic satisfaction in marital relationships. Soon after, he began gathering case histories of sexual behavior. As a pioneer in the nascent field of sexology, Kinsey saw that the key to its cogency was grounded in observation combined with the collection and classification of mass data. To support the institutionalization of his work, he cofounded the Institute for Sex Research at Indiana University in 1947. He and his staff eventually conducted over eighteen thousand personal interviews about sexual behavior, and in 1948 he published *Sexual Behavior in the Human Male*, to be followed in 1953 by *Sexual Behavior in the Human Female*. As Drucker's study shows, Kinsey's scientific rigor and his early use of data recording methods and observational studies were unparalleled in his field. Those practices shaped his entire career and produced a wellspring of new information, whether he was studying gall wasp wings, writing biology textbooks, tracing patterns of evolution, or developing a universal theory of human sexuality.

Climate change is an enormous and increasingly urgent issue. This important

book highlights how humanities disciplines can mobilize the creative and critical power of students, teachers, and communities to confront climate change. The book is divided into four clear sections to help readers integrate climate change into the classes and topics they are already teaching as well as engage with interdisciplinary methods and techniques. Teaching Climate Change in the Humanities constitutes a map and toolkit for anyone who wishes to draw upon the strengths of literary and cultural studies to teach valuable lessons that engage with climate change.
