5-Steps, Barron's and the others are great resources for reviewing at the end of the year, but Tamm's Textbook Tools accompany kids all year long. They are filled with assignments that follow the regular book throughout the year, all 34 chapters. They can also be used as reviews. Teachers can copy vocab lists and chapter activities at will, and they are perfect if there is a substitute. When publishers started putting the majority of their content online, it opened a niche for traditional paper assignments. But it doesn't matter whether the textbook is written in ink or electrons, students still need to write and keep a notebook for themselves. Portfolios still matter. This series fills that void. Easily collectible, it may also be used as a student consumable. Save hundreds of hours of planning time. Facebook message or email (hudsonfla@gmail.com) if you want bulk pricing for a class set.

World Military History Bibliography Prentice Hall

The past is not simply a list of events. Historical records are the means by which historians develop their interpretations of those events. Because interpretations differ, there is no single historical record, but various narrations of events each told from a different perspective. Therefore the study of history is intimately linked to the study of values, the values of the historical actors, the historians who have written about them, and of the students engaged in learning about them. The World's History links chronology, themes, and geography in eight units, or Parts, of study. The Parts move progressively along a time line from the emergence of early humans to the present day. Each Part emphasizes a single theme--for example, urbanization or religion or migration--and students learn to use them all to analyze historical events and to develop a grasp of the chronology of human development. The final chapter employs all the themes developed in the first seven Parts as tools for understanding the history of our own times. Geographically, each Part covers the entire globe, although specific topics place greater emphasis on specific regions.
