Hello, I have disassembled valve body of Prestolite trim pump (type without control valve and without manual release valve), and I know most of parts where should be positioned to assemble it again, but I am not sure of two smaller springs in which place should which one go?

Prestolite - Leece Neville
If the unit won't go all the way up by itself, you need to loosen the manual release valve a couple of turns and raise the motor by hand. It's easier if you grab the gearcase near the prop and lift. Then you tighten the release valve and add fluid till it's even with the bottom of the fill hole.

POWER TRIM AND TILT
SYSTEMS 535 Trim

Limit/Trim Position Sender
Switches The trim limit
(TL) switch is located on
the left side of the gimbal
housing. This switch
permits only a limited
amount of outward trim
travel to provide safe
control at high speeds and
prevent damage to drive
unit or trim cylinder due to
lost side support of drive
unit.

Manual Release is when
you manually open the
safety valve to release the
pressure quickly, allowing
you to open your Instant
Pot. In between is what I've
heard called a "Timed
Natural Release" where you
let it sit for a certain amount
of time and if the safety
valve hasn't released itself
by then, you do a Manual
Release.
