Prevent and Reverse Heart Disease challenges conventional cardiology by posing a compelling, revolutionary idea-that we can, in fact, abolish the heart disease epidemic in this country by changing our diets. Drawing on the groundbreaking results of his twenty-year nutritional study, Dr. Caldwell B. Esselstyn, Jr., a former surgeon, researcher, and clinician at the Cleveland Clinic, convincingly argues that a plant-based, oil-free diet can not only prevent and stop the progression of heart disease, but also reverse its effects. Furthermore, it can eliminate the need for expensive and invasive surgical interventions, such as bypass and stents, no matter how far the disease has progressed. Dr. Esselstyn began his research with a group of patients who joined his study after traditional medical procedures to treat their advanced heart disease had failed. Within months of following a plant-based, oil-free diet, their angina symptoms eased, their cholesterol levels dropped significantly, and they experienced a marked improvement in blood flow to the heart. Twenty years later, the majority of Dr. Esselstyn's patients continue to follow his program and remain heart-attack proof. Prevent and Reverse Heart Disease explains the science behind these dramatic results, and offers readers the same simple, nutrition-based plan that has changed the lives of his patients forever. In addition, Dr. Esselstyn provides more than 150 delicious recipes that he and his wife, Ann Crile Esselstyn, have enjoyed for years and used with their patients. Clearly written and backed by irrefutable scientific evidence, startling photos of angiograms, and inspiring personal stories, Prevent and Reverse Heart Disease will empower readers to take charge of their heart health. It is a powerful call for a paradigm shift in heart-disease therapy.

The Ornish Diet has been named the “ #1 best diet for heart disease ” by U.S. News & World Report for seven consecutive years! Dr. Dean Ornish is the first clinician to offer documented proof that heart disease can be halted, or even reversed, simply by changing your lifestyle. Based on his internationally acclaimed scientific study, which has now been ongoing for years, Dr. Ornish's program has yielded amazing results. Participants reduced or discontinued medications; they learned how to lower high blood pressure; their chest pain diminished or disappeared; they felt more energetic, happy, and calm; they lost weight while eating more; and blockages in coronary arteries were actually reduced. In his breakthrough book, Dr. Ornish presents this and other dramatic evidence and guides you, step-by-step, through the extraordinary Opening Your Heart program, which is winning landmark approval from America's health insurers. The program takes you beyond the purely physical side of health care to include the psychological, emotional and spiritual aspects so vital to healing. This book represents the best modern medicine has to offer. It can inspire you to open your heart to a longer, better, happier life.

How You Can Prevent and Reverse Heart Disease With Natural and Conventional Strategies Little, Brown Spark

From the physician behind the wildly popular NutritionFacts website, *How Not to Die* reveals the groundbreaking scientific evidence behind the only diet that can prevent and reverse many of the causes of disease-related death. The vast majority of premature deaths can be prevented through simple changes in diet and lifestyle. In *How Not to Die*, Dr. Michael Greger, the internationally-renowned nutrition expert, physician, and founder of NutritionFacts.org, examines the fifteen top causes of premature death in America-heart disease, various cancers, diabetes, Parkinson's, high blood pressure, and more-and explains how nutritional and lifestyle interventions can sometimes trump prescription pills and other pharmaceutical and surgical approaches, freeing us to live healthier lives. The simple truth is that most doctors are good at treating acute illnesses but bad at preventing chronic disease. The fifteen leading causes of death claim the lives of 1.6 million Americans annually. This doesn't have to be the case. By following Dr. Greger's advice, all of it backed up by strong scientific evidence, you will learn which foods to eat and which lifestyle changes to make to live longer. History of prostate cancer in your family? Put down that glass of milk and add flaxseed to your diet whenever you can. Have high blood pressure? Hibiscus tea can work better than a leading hypertensive drug-and without the side effects. Fighting off liver disease? Drinking coffee can reduce liver inflammation. Battling breast cancer? Consuming soy is associated with prolonged survival. Worried about heart disease (the number 1 killer in the United States)? Switch to a whole-food, plant-based diet, which has been repeatedly shown not just to prevent the disease but often stop it in its tracks. In addition to showing what to eat to help treat the top fifteen causes of death, *How Not to Die* includes Dr. Greger's Daily Dozen -a checklist of the twelve foods we should consume every day.Full of practical, actionable advice and surprising, cutting edge nutritional science, these doctor's orders are just what we need to live longer, healthier lives.

NO More Heart Disease Ivy Books

Nowadays, more and more people are faced with problems of the heart and cardiovascular system. In the modern world, this is no longer a disease of the elderly. That's why we have to strengthen our heart from an early age and support it throughout our lives. Specially developed recipes will become a powerful shield in the fight

against heart diseases. Well-balanced nutrition allows effective prevention and treatment of cardiovascular diseases, and also greatly enhances the therapeutic effect of pills. The diet for patients who have heart diseases and problems with blood vessels should contain a minimum amount of salt, limited in the content of dietary cholesterol and animal fat, with normal or low-calorie content. The diet should contain a sufficient amount of foods rich in dietary fiber, potassium, and magnesium, polyunsaturated fatty acids of the omega-3 and omega-6 families. Such nutrition will slow down the development of atherosclerosis, normalize blood pressure, reduce swelling, shortness of breath, and also reduce the risk of developing such formidable complications as myocardial infarction and stroke. NEW YORK TIMES BESTSELLER As Featured on PBS How to stay healthy and boost immunity with #1 New York Times bestselling author Dr. Joel Fuhrman's no-nonsense, results-driven nutrition plan. As a family physician for over 30 years and #1 New York Times bestselling author Joel Fuhrman, M.D. will tell you that doctors and medications cannot grant you excellent health or protection from disease and suffering. The most effective health-care is proper self-care and that starts with changing the way we eat. Eat for Life delivers a science-backed nutrition-based program that prevents and even reverses most medical problems within three to six months. This is a bold claim but the science and the tens of thousands who have tried this approach back it up. The truth is: you simply do not have to be sick. Most Americans are deficient in the vitamins, minerals and phytonutrients found in plants (micronutrients), and consume too many fats, proteins, carbohydrates (macronutrients). The results of this standard diet is that we are not only shortening our lives but damaging

our energy, vitality, and daily health by eating packaged and processed foods, excessive meat and dairy, and unsustainable amounts of salt and sugar. What we need is to consume foods rich in phytonutrients such as greens, beans, onions, mushrooms, berries, and seeds. These delicious and abundant foods contain the largest assortment of micronutrients and when consumed in adequate quantities they prevent and reverse diabetes and heart-disease, lower cholesterol and blood pressure, and reduce hunger and food cravings. Rooted in the latest nutritional science and complete with recipes, menu plans, and testimonials, *Eat for Life* offers everything you need to change the course of your health and put this life-changing program to work for you.

The Breakthrough Nutrient-Rich Program for Longevity, Disease Reversal, and Sustained Weight Loss Rutgers University Press

Heart disease is the number one cause of death and hospitalization in developed countries, and yet it is largely preventable. Think about that for a moment. How is that possible? What is required is good information. Did you know that more than half of those suffering from cardiovascular disease have cholesterol in the normal range? Would it surprise you to learn that the majority of cardiovascular events are attributed to blockages of less than fifty percent? Your arteries are a muscle not a pipe, therefore beating heart disease takes work, but it can be done. Diamond Fernandes is an authority on heart health, and in this book, he shares how you can navigate heart disease along with his five powerful pillars to preventing and reversing heart disease.
