Perspectives on Neoliberalism, Labour and Globalization in India Springer
Across Africa, a burgeoning middle class has become the poster child for the 'Africa rising' narrative. Ambitious, aspirational and increasingly affluent, this group is said to embody the values and hopes of the new Africa, with international bodies ranging from the United Nations Development Programme to the World Bank regarding them as important agents of both economic development and democratic change. This narrative, however, obscures the complex and often ambiguous role that this group actually plays in African societies. Bringing together economists, political scientists, anthropologists and development experts, and spanning a variety of case studies from across the continent, this collection provides a much-needed corrective to the received wisdom within development circles, and provides a fresh perspective on social transformations in contemporary Africa.

The Politics of Aesthetics rethinks the relationship between art and politics, reclaiming "aesthetics" from the narrow confines it is often reduced to. Jacques Rancière reveals its intrinsic link to politics by analysing what they both have in common: the delimitation of the visible and the invisible, the audible and the inaudible, the thinkable and the unthinkable, the possible and the impossible. Presented as a set of inter-linked interviews, The Politics of Aesthetics provides the most comprehensive introduction to Rancière's work to date, ranging across the history of art and politics from the Greek polis to the aesthetic revolution of the modern age. Available now in the Bloomsbury Revelations series 10 years after its original publication, The Politics of Aesthetics includes an afterword by Slavoj Žižek, an interview for the English edition, a glossary of technical terms and an extensive bibliography.

It's no secret that certain social groups have predominated India's business and trading history, with business traditionally being the preserve of particular 'Bania' communities. However, the past four or so decades have seen a widening of the social base of Indian capital, such that the social profile of Indian business has expanded beyond recognition, and entrepreneurship and commerce in India are no longer the exclusive bastion of the old mercantile castes. In this meticulously researched book ? acclaimed for being the first social history to document and understand India's new entrepreneurial groups ? Harish Damodaran looks to answer who the new 'wealth creators' are, as he

traces the transitional entry of India's middle and lower peasant castes into the business world. Combining analytical rigour with journalistic flair, India's New Capitalists is an essential read for anyone seeking to understand the culture and evolution of business in contemporary South Asia.

The tank revolutionized the battlefield in World War II. In the years since, additional technological developments—including nuclear weapons, ballistic missiles, computer assisted firing, and satellite navigation—have continued to transform the face of combat. The only complete history of U.S. armed forces from the advent of the tank in battle during World War I to the campaign to drive Iraq out of Kuwait in 1991, Camp Colt to Desert Storm traces the development of doctrine for operations at the tactical and operational levels of war and translates this fighting doctrine into the development of equipment.

Design Is The Problem Arms & Armour
Design makes a tremendous impact on the produced world in terms of usability, resources, understanding, and priorities. What we produce, how we serve customers and other stakeholders, and even how we understand how the world works is all affected by the design of models and solutions. Designers have an unprecedented opportunity to use their skills to make meaningful, sustainable change in the world—if they know how to focus their skills, time, and agendas. In Design is the Problem: The Future of Design Must be Sustainable, Nathan Shedroff examines how the endemic culture of design often creates unsustainable solutions, and shows how designers can bake sustainability into their design processes in order to produce more sustainable solutions.

An anatomy of failed-state Britain, by the author of A Guide to the New Ruins of Great Britain. In A Guide to the New Ruins of Great Britain, Owen Hatherley skewered New Labour's architectural legacy

in all its witless swagger. Now, in the year of the Diamond Jubilee and the London Olympics, he sets out to describe what the Coalition's altogether different approach to economic mismanagement and civic irresponsibility is doing to the places where the British live. In a journey that begins and ends in the capital, Hatherley takes us from Plymouth and Brighton to Belfast and Aberdeen, by way of the eerie urbanism of the Welsh valleys and the much-mocked splendour of modernist Coventry. Everywhere outside the unreal Southeast, the building has stopped in towns and cities, which languish as they wait for the next bout of self-defeating austerity. Hatherley writes with unrivalled aggression about the disarray of modern Britain, and yet this remains a book about possibilities remembered, about unlikely successes in the midst of seemingly inexorable failure. For as well as trash, ancient and modern, Hatherley finds signs of the hopeful country Britain once was and hints of what it might become.

Imperial Leather chronicles the dangerous liaisons between gender, race and class that shaped British imperialism and its bloody dismantling. Spanning the century between Victorian Britain and the current struggle for power in South Africa, the book takes up the complex relationships between race and sexuality, fetishism and money, gender and violence, domesticity and the imperial market, and the gendering of nationalism within the zones of imperial and anti-imperial power.

Though science fiction is often thought of as a Western phenomenon, the genre has long had a foothold in countries as diverse as India and Mexico. These fourteen critical essays examine both the role of science fiction in the third world and the role of the third world in science fiction. Topics covered include science fiction in Bengal, the genre's portrayal of Native Americans, Mexican cyberpunk fiction, and the undercurrents of colonialism and Empire in traditional science fiction. The intersections of science fiction theory and postcolonial theory are explored, as well as science fiction's contesting of imperialism and how the third world uses the genre to recreate itself. Instructors considering this book for use in a course may request an examination copy here.

Kord and Krimmer investigate the most common male types - cops, killers, fathers, cowboys, superheroes, spies, soldiers, rogues, lovers, and losers - by tracing changing concepts of masculinity in popular Hollywood blockbusters from 1992 to 2008 - the Clinton and Bush eras - against a backdrop of contemporary political events, social developments, and popular American myths. Their in-depth analysis of over sixty films, from *The Matrix* and *Iron Man* to *Pirates of the Caribbean* and *The Lord of the Rings*, shows that movies, far from being mere entertainment, respond directly to today's social and political realities, from consumerism to "family values" to the War on Terror.

The New Aesthetic and Art Routledge

Highly Commended in the Society of Educational Studies Book Prize This book explores how economic changes and the growing importance of educational qualifications in a shrinking labour market, particularly effects marginalized young men. It follows a group of young working-class men in a de-industrial community and challenges commonly held representations that often appear in the media and in policy discourses which portray them as feckless, out of control, educational failures and lacking aspiration. Ward argues that for a group of young men in a community of social and economic deprivation, expectations and transitions to adulthood are framed through the industrial legacy of geographically and historically shaped class and gender codes. These codes have an impact on what it means to be a man and what behaviour is deemed acceptable and what is not.

Against Technology University Press of Kentucky

This book employs a variety of perspectives such as Institutional, Social Democratic, Marxist, Gender and Informal, Biblical and Dalit, to critically examine the impact of neo-liberal globalisation on both formal and informal sectors of the labour market and the industrial relations system. The narratives not only interrogate current institutions and paradigms, but also outline future developments.

The French philosopher Jacques Rancière has influenced disciplines from history and philosophy to political theory, literature, art history, and film studies. His research into nineteenth-century workers' archives, reflections on political equality, critique of the traditional division between intellectual and manual labor, and analysis of the place of literature, film, and art in modern society have all constituted major contributions to contemporary thought. In this collection, leading scholars in the fields of philosophy, literary theory, and cultural criticism engage Rancière's work, illuminating its originality, breadth, and rigor, as well as its place in current debates. They also explore the relationships between Rancière and the various authors and artists he has analyzed, ranging from Plato and Aristotle to Flaubert, Rossellini, Auerbach, Bourdieu, and Deleuze. The contributors to this collection do not simply elucidate Rancière's project; they also critically respond to it from their own perspectives. They

consider the theorist's engagement with the writing of history, with institutional and narrative constructions of time, and with the ways that individuals and communities can disturb or reconfigure what he has called the "distribution of the sensible." They examine his unique conception of politics as the disruption of the established distribution of bodies and roles in the social order, and they elucidate his novel account of the relationship between aesthetics and politics by exploring his astute analyses of literature and the visual arts. In the collection's final essay, Rancière addresses some of the questions raised by the other contributors and returns to his early work to provide a retrospective account of the fundamental stakes of his project.
