Henry O. Pollak Chairman of the International Program Committee Bell Laboratories Murray Hill, New Jersey, USA

The Fourth International Congress on Mathematics Education was held in Berkeley, California, USA, August 10-16, 1980. Previous Congresses were held in Lyons in 1969, Exeter in 1972, and Karlsruhe in 1976. Attendance at Berkeley was about 1800 full and 500 associate members from about 90 countries; at least half of these come from outside of North America. About 450 persons participated in the program either as speakers or as presiders; approximately 40 percent of these came from the U.S. or Canada. There were four plenary addresses; they were delivered by Hans Freudenthal on major problems of mathematics education, Hermina Sinclair on the relationship between the learning of language and of mathematics, Seymour Papert on the computer as carrier of mathematical culture, and Hua Loo-Keng on popularising and applying mathematical methods. George Polya was the honorary president of the Congress; illness prevented his planned attendance but he sent a brief presentation entitled, "Mathematics Improves the Mind". There was a full program of speakers, panelists, debates, miniconferences, and meetings of working and study groups. In addition, 18 major projects from around the world were invited to make presentations, and various groups representing special areas of concern had the opportunity to meet and to plan their future activities.

The experts at The Princeton Review offer the most complete and effective preparation for two important secondary school admissions exams, the SSAT (Secondary School Admission Test) and ISEE (Independent School Entrance Examination). SSAT & ISEE Prep, 2021, previously titled Cracking the SSAT & ISEE, includes a thorough review of the fundamentals of the Math, Verbal, and Reading sections for both tests. About the tests- The SSAT has 2 levels (Lower- for students entering grades 6-8; Upper- 9-12), while the ISEE has 3 levels\* (Lower- grades 5-6; Middle- grades 7-8; Upper- grades 9-12). Both exams test verbal skills, reading comprehension, and math/quantitative skills, and both have an essay. While most schools require one or the other exam, students who have a choice generally opt for the ISEE if they are better-skilled at math, and the SSAT if better-skilled in language arts. \*The ISEE also has a Primary Level for grades 2-4, which is rarely taken; neither our title nor competitive titles address it.

Pratiyogita Darpan Cambridge University Press

Mathematics in schools offering the Integrated Programme is usually taught as an integrated subject, so that students will be able to better relate learnt knowledge to new knowledge and transfer conceptual understanding to application, as many mathematical concepts are interconnected. One driving force to write the series is to provide a guidebook especially for students in the Integrated Programme. The other is to share teaching ideas with other Mathematics teachers who love the subject as much as I do. Features: Each topic begins with a recap of key mathematical concepts to help students consolidate learning. Worked examples are included to enhance understanding and application of key concepts, with side notes explaining some of the working. Practice questions are tiered into three levels of difficulty. Level 1 aims to provide students with the necessary practice; Level 2 to further build the confidence and test students understanding; Level 3 to challenge students with higher order thinking questions. Math Wonderland is one highlight of the book. Activities include extension of the topic, suggested alternative assessment and questions to stretch

mathematical thinking. The primary purpose of the Wonderland is to allow students to think deeply about what they have learnt and to appreciate the learning of Mathematics beyond classroom. Step-by-step solutions to all questions are provided as an additional resource to students problem solving process. I hope this book will benefit students studying Integrated Mathematics, as well as those with aptitude for the subject who are preparing for the GCE O Level Mathematics and Additional Mathematics examinations.
