Learn the fundamentals of PowerShell to build reusable scripts and functions to automate administrative tasks with Windows About This Book Harness the capabilities of the PowerShell system to get started quickly with server automation Learn to package commands into a reusable script and add control structures and parameters to make them flexible Get to grips with cmdlets that allow you to perform administration tasks efficiently Who This Book Is For This book is intended for Windows administrators or DevOps users who need to use PowerShell to automate tasks. Whether you know nothing about PowerShell or know just enough to get by, this guide will give you what you need to go to take your scripting to the next level. What You Will Learn Learn to verify your installed version of PowerShell, upgrade it, and start a PowerShell session using the ISE Discover PowerShell commands and cmdlets and understand PowerShell formatting Use the PowerShell help system to understand what particular cmdlets do Utilise the pipeline to perform typical data manipulation Package your code in scripts, functions, and modules Solve common problems using basic file input/output functions Find system information with WMI and CIM Automate IIS functionality and manage it using the WebAdministration module In Detail Windows PowerShell is a task-based command-line shell and scripting language designed specifically for system administration. Built on the .NET Framework, Windows PowerShell helps IT

professionals and power users control and automate the administration of the Windows operating system and applications that run on Windows. PowerShell is great for batch importing or deleting large sets of user accounts and will let you collect a massive amount of detailed system information in bulk via WMI (Windows Management Instrumentation). *Getting Started with PowerShell* is designed to help you get up and running with PowerShell, taking you from the basics of installation, to writing scripts and web server automation. This book, as an introduction to the central topics of PowerShell, covers finding and understanding PowerShell commands and packaging code for reusability, right through to a practical example of automating IIS. It also includes topics such as installation and setup, creating scripts, automating tasks, and using Powershell to access data stores, registry, and file systems. You will explore the PowerShell environment and discover how to use cmdlets, functions, and scripts to automate Windows systems. Along the way, you will learn to perform data manipulation and solve common problems using basic file input/output functions. By the end of this book, you will be familiar with PowerShell and be able to utilize the lessons learned from the book to automate your servers. Style and approach A practical learning guide, complete with plenty of activities, examples and screenshots.

INTRODUCTION - The reflection of Home science text back to ancient days when special education on all aspects of life was given to girls for managing harmonious home and family life till formal education for girls in this direction was introduced by Madras mission school in 1915. The girls were educated on aspects like taking good care of children, supplying nutritious food to family, building health of family and managing their homes. This was the initiation of the concept of Home science through the education was not formally named as home science. Efforts were continue to make this education meaningful and suitable to life of a girls who got married in her early teens. Later early 90s witness the boost of special education for girls called home science education. The stepping stone in this direction was introduction of Home science subject in 1927 by educational planner at All India women's conference. The society recognise this education as a symbol of high status and the parents got encouraged to send their daughters for home science education. This was further supported by National Freedom Movement in thirties and forties of 19th century when equality of women was sought in all aspects of their expanded role in home and development of the nation. Even Sargent committee in 1944 highly acknowledge the importance of Home science as subject in schools for girls.
