Principles of Economics | Carl Menger - Mises Institute

The implication of this theory is that the individual mind is the source of economic value — a point that touched off the marginalist revolution and started a departure from the flawed classical view of economics. For this reason, Carl Menger (1840 – 1921) is considered to be the founder of the Austrian School of economics. Principles of Economics is the book that Ludwig von Mises said turned him into a real economist. Carl Menger - Wikipedia

In 1867 Menger began a study of political economy which culminated in 1871 with the publication of his Principles of Economics (Grundsätze der Volkswirtschaftslehre), thus becoming the father of the Austrian School of economic thought. It was in this work that he challenged classical cost-based theories of value with his theory of marginality – that price is determined at the margin.
