Introduction to the Principles of Heat Transfer

Basics of Heat Transfer. In the simplest of terms, the discipline of heat transfer is concerned with only two things: temperature, and the flow of heat.

Temperature represents the amount of thermal energy available, whereas heat flow represents the movement of thermal energy from place to place.

Principles of Heat Transfer. Heat is transferred to and from

objects -- such as you and your home -- via three processes:

conduction, radiation, and convection. Conduction is heat

traveling through a solid material. On hot days, heat is conducted into your home through the roof, walls, and windows.
