Trick Mirror is an enlightening, unforgettable trip through the river of self-delusion that surges just beneath the surface of our lives. This is a book about the incentives that shape us, and about how hard it is to see ourselves clearly through a culture that revolves around the self. In each essay, Tolentino writes about a cultural prism: the rise of the nightmare social internet; the advent of scamming as the definitive millennial ethos; the literary heroine’s journey from brave to blank to bitter; the punitive dream of optimization, which insists that everything, including our bodies, should become more efficient and beautiful until we die. Gleaming with Tolentino’s sense of humor and capacity to elucidate the impossibly complex in an instant, and marked by her desire to treat the reader with profound honesty, Trick Mirror is an instant classic of the worst decade yet. Some days you need a pick-me-up, some days you need a life preserver. “For most of us,” writes Anna Borges, “self-care is a wide spectrum of decisions and actions that soothe and fortify us against all the shit we deal with.” You may already practice some form of self-care, whether it’s taking an extra-long shower after a stressful day, splurging on a ~fancy~ dinner, or choosing Netflix over that friend-of-a-friend’s birthday party. But when life gets so overwhelming that you want to stay in bed, some more radical care is crucial to maintain your sanity. The More or Less Definitive Guide to Self-Care is here to help you exist in the world. Borges gathers over 200 tips, activities, and stories (from experts and everyday people alike) into an A-to-Z list—from asking for help and burning negative thoughts to the importance of touch and catching some Zzz’s. Make any day a little more OK with new skills in your self-care toolkit—and energy to show up for yourself.

This book explores the consequences of lowering the voting age to 16 from a global perspective, bringing together empirical research from countries where at least some 16-year-olds are able to vote. With the aim to show what really happens when younger people can take part in elections, the authors engage with the key debates on earlier enfranchisement and examine the lead-up to and impact of changes to the voting age in countries across the globe. The book provides the most comprehensive synthesis on this topic, including detailed case studies and broad comparative analyses. It summarizes what can be said about youth political participation and attitudes, and highlights where further research is needed. The findings will be of great interest to researchers working in youth political socialization and engagement, as well as to policymakers, youth workers and activists.

This informative book is a necessary companion for anyone seeking to uncover the secret of successful persuasion: to organize, construct, and communicate arguments. It is at once comprehensive and accessible, an authoritative guide to logical thinking and effective communication. First, the text defines the nature and uses of argument, explaining how to read argument carefully. Such analysis then requires the student to reconstruct arguments in his or her own words. Finally, the reader is taught how to create a critical, reasoned response, thus constructing his or her own argument. To increase its accessibility and expand its range of application, Critical Inquiry uses (in addition to textual examples) advertisements from print media as ‘texts’ for applying its principles to subjects outside the traditional mode of academic presentation. Throughout, carefully selected reading questions and exercises pace the reader and ensure that the material is securely grasped and successfully applied.

"HELP! My Students Can't Write!" Why You Need a Writing Revolution in Your Classroom and How to Lead It. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, TWR can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities TWR is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

In this book we present a collection of papers around the topic of Agent Communication. The communication between agents has been one of the major topics of research in multi-agent systems. The current work can therefore build on a number of previous workshops, the proceedings of which have been published in earlier volumes in this series. The basis of this collection is the accepted missions of the workshop on Agent Communication Languages which was held in conjunction with the AAMAS conference in July 2003 in Melbourne. The workshop received 15 submissions of which 12 were selected for publication in this volume. Although the number of submissions was less than expected for an important area like Agent Communication there is no reason to worry that this area does not get enough attention from the agent community. First of all, the 12 selected papers are all of high quality. The high acceptance rate is only due to this high quality and not to the necessity to select a certain number of papers. Besides the high-quality workshop papers, we noticed that many papers on Agent Communication found their way to the main conference. We decided therefore to invite a number of authors to revise and extend their papers from this conference and to combine them with the workshop papers. We believe that the current collection comprises a very good and quite complete overview of the state of the art in this area of research and gives a good indication of the topics that are of major interest at the moment.
