The ultimate purpose of Principled Principles for Financial Prosperity is to create financial consciousness in the reader with a view of making the readers break even and remain at the top, irrespective of any ill or positive wind sweeping across the corridors of the financial arena. It is equally a purpose objective of this book to provide information that can enhance informed decisions, offering readers the realization that it is far better to be a reflexive finance pro-actor than to be a subsequent finance reactor and awaken its readers to the reality that money, its management, and its handling do not need face value understanding. The point here is that there are mysteries surrounding money whose deeper understandings are most necessary. The application of these understandings would shape the readers attitude to money, spending, and management.

The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world.

THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." News Dissector DANNY SCHECHTER is a journalist, blogger and filmmaker. He has been reporting on economic crises since the 1980's when he was with ABC News.
