Probability, Statistics, and Reliability for Engineers and ...

Reliability engineering is a well-developed discipline closely related to statistics and probability theory.

There are many areas in reliability engineering, for example: reliability data analysis with the time-domain probabilistic models of reliability, failure rate, and hazard rate by using time as the random variable to

address the probability of failure as a function of mission time (e.g., analysis with the Weibull distribution); the stress–strength probabilistic interference model by ...
