Carson-Dellosa Publishing NCTM's Process Standards were designed to support teaching that helps children develop independent, effective mathematical thinking. The books in the Heinemann Math Process Standards Series give every elementary teacher the opportunity to explore each one of the standards in

depth. And with language and examples that don't require prior math training to understand, the series offers friendly, reassuring advice to any teacher preparing to embrace the Process Standards. In the second edition of Introduction to Problem Solving, Susan O'Connell updates her popular and easy-to-use guide. O'Connell eases you into problem solving, giving you an array of entry points for understanding, planning, and teaching; strategies that help students develop mathematical thinking; and a wealth of all-new activities that are modifiable for immediate use with students of all levels. Written by a veteran teacher for teachers of every level of experience, Introduction to Problem Solving fosters a new awareness of the importance of problem solving and highlights ways to implement it without rewriting your curriculum. Best of all, like all the titles in the Math Process Standards Series, Introduction to Problem Solving comes with two powerful tools to help you get started and plan well: online resources with activities customizable to match your lessons and a correlation guide that helps you match mathematical content with the processes it utilizes. If problem solving is a problem you'd like to solve. Or if you're simply looking for new ways to work the problem-solving standards into your curriculum, read, dog-ear, and teach with Introduction to Problem Solving, Second Edition. And if you'd like to learn about any of NCTM's process standards, or if you're looking for new, classroom-tested ways to address them in your math teaching, look

no further than Heinemann's Math Process Standards Series. You'll find them explained in the most understandable and practical way: from one teacher to another.

Maths Problem Solving - Year 3 is the third of six books in the Maths Problem Solving series. The books have been written for teachers to use during the numeracy lesson. They cover the 'solving problem' objectives from the numeracy framework. This book contains three chapters; Making decisions, Reasoning about numbers or shapes and Problems involving 'real life', money or measures. The books are designed in such a way that each section has six stages of questions to be worked through. Every stage is split into three levels, for example 1a, 1b or 1c, based on achievement. Each corresponding question from these levels follow

the same line of questioning, so that when the teacher talks about a certain question, the solution process is the same for each level but the complexity of the sum varies.

For some students, the mere thought of solving a word problem can transform even the most confident among them into nervous wrecks. In her guidebook, Math Vitamins, retired educator Loretta Jean Everhart shares her methods of success that will help any student from Pre-K to fifth grade effectively solve even the most challenging word problems. Everhart taught elementary students for over

thirty years and relies on her diverse experience working with students of all levels to offer useful techniques and step-by-step guidance that will lead parents and teachers through several ways to cope with math anxiety, improve math writing and vocabulary, and use cooperative learning to solve word problems. While providing simple strategies like having children work on jigsaw puzzles to learn guess and test methodologies, Everhart also shares an in-depth exploration of Polya's four-step model, which helps children first understand the problem and then develop a plan on how to answer it. For the parent of a home-schooled child or for teacher who is searching for new ideas, this innovative guidebook offers practical tips and suggestions that will help lead struggling students out of the often tricky world of word problems and onto a successful path of future problem solving.
