Our Brain Book is an engaging, approachable book that helps children and

adults understand how their brains work as we humans interact. Social Emotional Learning concepts and human emotions are sometimes difficult to understand and apply. Our Brain Book helps take away some of this mystery with fun, anatomy-based science. Through the tremendous hard work of pioneering researchers and educational leaders, Social Emotional Learning tenants have entered the mainstream culture and have become an important pillar for most all educational facilities. Adlerian constructs, authoritative leadership, and classroom leadership tools have been proven for student growth. Our Brain Book was developed for students, teachers, principals, parents to help provide approachable, easy-to-understand connection between the

physiological brain science to the emotional experience of human communication and connection. It helps the child (and any human) understand the science of their feelings and actions while explaining to the leader, teacher, or parent how to help with co-regulation. It creates a common understanding and framework to discuss our interactions and reactions, and how to make them more positive and productive. We hope it helps every person and their community in our collective desires to self-regulate and be our better self in stressful situations.

In the second edition of Reading with Meaning, Debbie Miller shares her new thinking about comprehension strategy instruction, the gradual release of responsibility instructional model, and planning for student engagement and independence. It has been ten years since the first edition, in which Debbie chronicled a year in her own classroom.

Reading with Meaning, Second Edition supports that work and expands her vision of strategy instruction and intentional teaching and learning. Debbie believes that every child deserves at least a full year of growth during each classroom year and offers planning documents with matching assessments to ensure that no child falls through the cracks. The second edition also provides new book recommendations that will engage and delight students, and current picture books for reading aloud and strategy instruction. This new edition reflects Debbie's professional experiences and judgment, her work in classrooms and collaboration with colleagues, and the current research in the field, showcasing her newest, best thinking.

[Building Mathematical Comprehension: Using Literacy Strategies to Make Meaning](#) Rainbow Bridge Publishing (UT)

Essential habits to build mathematical confidence and competence for all students! It has been said that teachers make approximately 1,500 decisions a day. Given the volume of work, it is no wonder that these decisions are frequently made reflex-like and in the moment. By intentionally nurturing effective habits in students, as well as in teachers, we can make these

decisions more deliberately and in so doing foster a positive relationship with mathematics that will set students on an unstoppable trajectory of math learning. *Eight Habits of Highly Effective Math Students (and the Teachers Who Teach Them)* focuses on developing eight essential habits that support mathematical competence and confidence in students. This resource is designed as a personalized, practice-based professional learning experience, leading you through a wealth of professional learning and application activities to support you in growing a specific math habit in your classroom to strengthen your students' math learning and build your own efficacy. The book offers the chance to "choose your own adventure" through three teacher inquiry options focused on a specific math habit: *Give it a Go!* (An Informal Exploration of a Teaching Action and Its Impact on Student Learning) *Classroom Inquiry* (A Classroom-Based Teacher Inquiry Project) *Focus on Equity* (A Teacher Inquiry to Notice and Disrupt Patterns of Inequity) This book provides an actionable

framework for improving math teaching and learning by Emphasizing a commitment to equity, because all students are capable of learning high-level mathematics when provided with access to high-quality instruction Helping teachers develop mindsets and habits to consciously reflect on their instructional practice to continually strengthen teaching effectiveness and student learning outcomes Curating short readings and practice-based professional learning activities that can be engaged in individually or collaboratively Highlighting the importance of celebrating growth and the role of teachers in nurturing good habits in their students Offering a guide to coaching the habit through a process called Notice, Nurture, Name, and Nudge Eight Habits of Highly Effective Math Students (and the Teachers Who Teach Them) is grounded in the unwavering belief that all students are math-capable and all teachers can effectively teach mathematics. The book can be used individually by elementary school teachers and education leaders at school and district

levels or in collaborative professional learning settings. It is an excellent companion to Holly Burwell and Sue Chapman ' s book Power-Up Your Math Community (Corwin, 2024).
