Critical Passages

Routledge

Combines genre research,

proven pedagogical practices, and short readings to help students develop their rhetorical flexibility by exploring and practicing the key actions that will appear in academic assignments, such as explaining, summarizing, synthesizing, and arguing. *Essential Actions for Academic Writers* is a writing textbook for all novice academic students, undergraduate or graduate, to help them understand how to write effectively throughout their academic and professional careers. While these novice writers

may use English as a second or additional language, this book is also intended for students who have done little writing in their prior education or who are not yet confident in their academic writing. Essential Actions combines genre research, proven pedagogical practices, and short readings to help students develop their rhetorical flexibility by exploring and practicing the key actions that will appear in academic assignments, such as explaining, summarizing, synthesizing, and arguing. Part I

introduces students to rhetorical situation, genre, register, source use, and a framework for understanding how to approach any new writing task. The genre approach recognizes that all writing responds to a context that includes the writer's identity, the reader's expectations, the purpose of the text, and the conventions that shape it. Part II explores each essential action and provides examples of the genres and language that support it. Part III leads students in combining the actions in different genres

and contexts, culminating in the project of writing a personal statement for a university or scholarship application. Laziness Does Not Exist Oxford University Press An important challenge to what currently masquerades as conventional wisdom regarding the teaching of writing. There seems to be widespread agreement that—when it comes to the writing skills of college students—we are in the midst of a crisis. In *Why They Can't Write*, John Warner, who taught writing

at the college level for two decades, argues that the problem isn't caused by a lack of rigor, or smartphones, or some generational character defect. Instead, he asserts, we're teaching writing wrong. Warner blames this on decades of educational reform rooted in standardization, assessments, and accountability. We have done no more, Warner argues, than conditioned students to perform "writing-related simulations," which pass temporary muster but

do little to help students develop their writing abilities. This style of teaching has made students passive and disengaged. Worse yet, it hasn't prepared them for writing in the college classroom. Rather than making choices and thinking critically, as writers must, undergraduates simply follow the rules—such as the five-paragraph essay—designed to help them pass these high-stakes assessments. In *Why They Can't Write*, Warner has crafted both a diagnosis for what ails us and a blueprint

for fixing a broken system. Combining current knowledge of what works in teaching and learning with the most enduring philosophies of classical education, this book challenges readers to develop the skills, attitudes, knowledge, and habits of mind of strong writers. **The Complete Guide to Article Writing** University of Michigan Press ELT This book contains detailed theoretical information as well as practical strategies, techniques and pedagogical tips. It also includes analysis to the problems and

challenges that face ESL/EFL students in general and Arab learners in specific. The book could be of interest not only to EFL researchers in academic writing, writing instructors, EFL educators at the college level, policymakers, and undergraduate and graduate students, but also for any second or foreign language teachers.

Food Matters Penguin Intelligence, Instruction, and Assessment shows how modern theories of intelligence can be directly applied by educators to the teaching of subject matter, regardless of the age of the students or the content being taught. It is

intended primarily for teachers at all levels--elementary, secondary, tertiary--who want to apply in their classrooms what we know about intelligence. The focus is not on modifying students' intelligence, per se, but on increasing their disciplinary knowledge and understanding. Hence, this book will help teachers learn how they can teach more effectively what they are already teaching. The assumption is that what teachers care most about is how they can improve upon what they are already doing, and how they can learn what they need to do in order to be more effective in their work.

The contributors are well known for their work on intelligence and education. Each chapter includes an accessible explanation of the author's theory of intelligence, and discusses the implications of that theory both for instruction and for assessment. The book is international in scope, reflecting both American and European perspectives. Anyone interested in knowing how modern theories of intelligence can be applied to education will want to read this book--particularly teachers and other education specialists, as well as developmental psychologists, cognitive psychologists, and

philosophers with an interest in applying psychological theory to classroom practice. It will serve well as a text for courses on educational psychology, intelligence, cognition and instruction, and foundations of teaching.

The controversial journalistic analysis of the mentality that fostered the Holocaust, from the author of *The Origins of Totalitarianism* Sparking a flurry of heated debate, Hannah Arendt's authoritative and stunning report on the trial of German Nazi leader Adolf Eichmann first appeared as a series of articles in *The New Yorker* in 1963.
