Teaching to Exceed in the English Language Arts Springer Science & Business Media With one exception, the essays which form this book have appeared in various Classical periodicals. They do not claim to present a comprehensive account of Petronius and his work, but are intended to illustrate by discussion some aspects of the work and its author that seem, to me at least, to be of interest. "Did Tacitus quote Petronius" appeared in L'A ntiquiM Classique XXXVII, 2, 1968, 641-643; "On Tacitus' Biography of Petronius" and "Petronius, Priapus and Priapeum LXVIII" in Classica et Mediae valia XXVI 1-2, 1965, 233-245, and XXVII 1-2, 1966, 225-242 respectively; "Some Comments on Petronius' Portrayal of Character" will appear soon in Eranos; "Eating People is Right" appeared in Hermes 97 Bd., 3, 1969,381-384; "Some Themes of Concealment and Pretence in Petronius' Satyricon" in Latomus Tome XXVIII, I, 1969, 99-119; and" Petronius, A Portrait of the Artist" in Symbolae Osloenses XLV, 1970, U8-128. I wish to thank the editors of these periodicals for their permission to reproduce the articles. Professor J.P. Sullivan was kind enough to let me see the proofs of his book: The Satyricon of Petronius, A Literary Study (London, 1968) before it was published. I acknowledge this with thanks. I wish to acknowledge permission from The Bodley Head to quote from F. Scott Fitzgerald's Tender is the Night, Bodley Head Scott Fitzgerald, VoL II p. 9l. I wish to thank Mrs. A. Brodie for typing the material, and Mrs. L. Andrew for her help with the proofs. Bulletin of the Atomic Scientists Taylor & Francis

“A must-read for anyone interested in incorporating meditation into their lifestyle.”

—Sanjay Gupta, MD, chief medical correspondent for CNN Heartfulness is an ideal, a spiritual way of living by and from the heart that is inclusive of all ideologies, beliefs, and religions. In this heart-centered book, a student in conversation with his teacher, Kamlesh D. Patel—affectionately known as Daaji, the fourth and current spiritual guide of the century-old Heartfulness tradition—present a unique method of meditation with the power to facilitate an immediate, tangible spiritual experience, irrespective of a person’s faith. Our modern, fast-paced world can be an overwhelming place. Every day, we’re bombarded with messages telling us that in order to be happy, fulfilled, and worthy, we must be better, do more, and accumulate as much material wealth as possible. Most of us move through our busy lives with our minds full of these ideas, multitasking as we strive to navigate the responsibilities and expectations we must meet just to make it through the day. But what if there is another way? What if, rather than letting the busyness of life overtake our minds, we learn to be heartfelt instead? Based on Daaji’s own combination of approaches and practices for the modern seeker—which draws from the teachings of Sahaj Marg, meaning “Natural Path”—Heartfulness is a contemporized version of the ancient Indian practice of Raja Yoga, a tradition that enables the practitioner to realize the higher Self within. While many books describe refined states of being, The Heartfulness Way goes further, providing a pragmatic course to experience those states for oneself, which, per the book’s guiding principle, is “greater than knowledge.” Heartfulness meditation consists of four elements—relaxation, meditation, cleaning, and prayer—and illuminates the ancient, defining feature of yogic transmission (or pranahuti), the utilization of divine energy for spiritual growth and transformation. Using the method, detailed practices, tips, and practical philosophy offered in this book, you’ll reach new levels of attainment and learn to live a life more deeply connected to the values of the Heartfulness way—with acceptance, humility, compassion, empathy, and love.

Signal processing plays an increasingly central role in the development of modern telecommunication

and information processing systems, with a wide range of applications in areas such as multimedia technology, audio-visual signal processing, cellular mobile communication, radar systems and financial data forecasting. The theory and application of signal processing deals with the identification, modelling and utilisation of patterns and structures in a signal process. The observation signals are often distorted, incomplete and noisy and hence, noise reduction and the removal of channel distortion is an important part of a signal processing system. Advanced Digital Signal Processing and Noise Reduction, Third Edition, provides a fully updated and structured presentation of the theory and applications of statistical signal processing and noise reduction methods. Noise is the eternal bane of communications engineers, who are always striving to find new ways to improve the signal-to-noise ratio in communications systems and this resource will help them with this task. * Features two new chapters on Noise, Distortion and Diversity in Mobile Environments and Noise Reduction Methods for Speech Enhancement over Noisy Mobile Devices. * Topics discussed include: probability theory, Bayesian estimation and classification, hidden Markov models, adaptive filters, multi-band linear prediction, spectral estimation, and impulsive and transient noise removal. * Explores practical solutions to interpolation of missing signals, echo cancellation, impulsive and transient noise removal, channel equalisation, HMM-based signal and noise decomposition. This is an invaluable text for senior undergraduates, postgraduates and researchers in the fields of digital signal processing, telecommunications and statistical data analysis. It will also appeal to engineers in telecommunications and audio and signal processing industries.

When you Read Like a Writer (RLW) you work to identify some of the choices the author made so that you can better understand how such choices might arise in your own writing. The idea is to carefully examine the things you read, looking at the writerly techniques in the text in order to decide if you might want to adopt similar (or the same) techniques in your writing. You are reading to learn about writing. Instead of reading for content or to better understand the ideas in the writing (which you will automatically do to some degree anyway), you are trying to understand how the piece of writing was put together by the author and what you can learn about writing by reading a particular text. As you read in this way, you think about how the choices the author made and the techniques that he/she used are influencing your own responses as a reader. What is it about the way this

text is written that makes you feel and respond the way you do?
