The ESL/ELL Teacher's Survival Guide Guilford Publications

This book is a call to action for English and English Language Arts teachers who understand that data are not numbers alone, learning is impossible to quantify, and students are our very best teachers. Writing teacher Angela Stockman shows us how pedagogical documentation—the practice of making learning visible, capturing what is seen and heard, and then interpreting those findings in the company of our students and our colleagues—is a humbling and humane practice that grounds what we

think we've come to know in the lived experiences of those we intend to serve.

In this rich resource, she offers: processes and protocols for documenting learning and analyzing data; resources and planning tools to help you design and execute your own projects; and a digital documentation notebook that you can download for guidance, inspiration, and examples. With the powerful tools in this book, you'll be inspired to reach students whose needs have been ignored by big data and whose identities have been erased by oppressive forms of assessment and evaluation.

High Impact Educational Practices (HIEPs) have been extensively tested as compelling pedagogies for university students from an array of backgrounds, especially for the underprepared, and those with limited opportunity for high-impact learning experiences. This handbook is written with our firm belief that while higher education practitioners around the world are focused on improving student outcomes, not many have access to a better understanding of the conceptual foundations, empirical research and best practices in student engagement and high impact educational pedagogies. In this book, we unpack the essential conceptual constructs around the notions of student engagement to encourage readers to purposefully add HIEPs to their pedagogical repertoire and engage in Scholarship of Teaching and Learning (SoTL) practices.

Teaching Accelerated and Corequisite Composition
is the first book to compile on-the-ground advice and

teaching strategies specifically curated for accelerated and corequisite writing courses. Trailblazers in the field from colleges across the United States—who developed a foundation for corequisites by facilitating equity and accessibility for marginalized students—speak to a range of topics and demographics, offering support for instructors and practical advice for improving student success. The book primarily explores accelerated composition through the lens of two-year colleges to answer a central question in the field: to what extent do educators need to alter two-year college curricular design? The contributors also delve into assessment, a crucial process for instructors and their students transitioning to accelerated learning; the key role that reading plays in the writing process; and noncognitive learning, an area of study that has been associated with accelerated learning since its inception. Together these thirteen chapters provide instructors with a strategic approach to teaching accelerated and corequisite composition. *Teaching Accelerated and Corequisite Composition* points toward a new way of approaching first-year composition: a method of instruction that fosters the growth and success of writers who were once considered underprepared for college writing and are now achieving unprecedented success.

Beyond Standardized Testing CRDG

The conventional wisdom in English education is that rubrics are the best and easiest tools for assessment. But sometimes it's better to be unconventional. In *Rethinking Rubrics in Writing Assessment*, Maja Wilson offers a new perspective on rubrics and argues for a better, more responsive way to think about assessing writers' progress. Though you may sense a disconnect between student-centered teaching and rubric-based assessment, you may still use rubrics for convenience or for want of better alternatives.

Rethinking Rubrics in Writing Assessment gives you the impetus to make a change, demonstrating how rubrics can hurt kids and replace professional decision making with an inauthentic pigeonholing that stamps standardization onto a notably

nonstandard process. With an emphasis on thoughtful planning and teaching, Wilson shows you how to reconsider writing assessment so that it aligns more closely with high-quality instruction and avoids the potentially damaging effects of rubrics. Stop listening to the conventional wisdom, and turn instead to a compelling new voice to find out why rubrics are often replaceable. Open *Rethinking Rubrics in Writing Assessment* and let Maja Wilson start you down the path to more sensitive, authentic style of writing assessment.
