“An in-depth, well-researched, and thoughtful exploration of the ‘fat boom’ in America.” —*The Boston Globe* Low carb, high protein, raw foods . . . despite our seemingly endless obsession with fad diets, the startling truth is that six out of ten Americans are overweight or obese. In *Fat Land*, award-winning nutrition and health journalist Greg Critser examines the facts and societal factors behind the sensational headlines, taking on everything from supersize to Super Mario, high-fructose corn syrup to the high costs of physical education. With a sharp eye and even sharper tongue, Critser examines why pediatricians are now treating conditions rarely seen in children before; why type 2 diabetes is on the rise; the personal struggles of those with weight problems—especially among the poor—and how agribusiness has altered our waistlines. Praised by the *New York Times* as “absorbing” and by *Newsday* as “riveting,” this disarmingly funny, yet truly alarming, exposé stands as an important examination of one of the most pressing medical and social issues in the United States. “One scary book and a good companion to Eric Schlosser’s *Fast Food Nation*.” —*Seattle Post-Intelligencer*

The study of addiction is dominated by a narrow disease ideology that leads to biological reductionism. In this short volume, editors Granfield and Reinharman make clear the importance of a more balanced contextual approach to addiction by bringing to light critical perspectives that expose the historical and cultural interstices in which the disease concept of addiction is constructed and deployed. The readings selected for this anthology include both classic foundational pieces and cutting-edge contemporary works that constitute critical addiction studies. This book is a welcome addition to drugs or addiction courses in sociology, criminal justice, mental health, clinical psychology, social work, and counseling.
