Giraffe Problems Harper Collins
A unique collection of competition problems from over twenty major national and international mathematical competitions for high school students. Written for trainers and participants of contests of all levels up to the highest level, this will appeal to high school teachers conducting a mathematics club who need a range of simple to complex problems and to those instructors wishing to pose a "problem of the week", thus bringing a creative atmosphere into the classrooms. Equally, this is a must-have for individuals interested in solving difficult and challenging problems. Each chapter starts with typical examples illustrating the central concepts and is followed by a number of

carefully selected problems and their solutions. Most of the solutions are complete, but some merely point to the road leading to the final solution. In addition to being a valuable resource of mathematical problems and solution strategies, this is the most complete training book on the market.

Aunt Harriet's Underground Railroad in the Sky Boys Town Press
Ann Cameron's beloved and bestselling chapter book series about Julian, his brother Huey, and his friend Gloria all begins right here! Julian has a big imagination. And he is great at telling stories. He can make people—especially his younger brother, Huey—believe just about anything. Like the story about the cats that come in the mail. Or the fig leaves that make you grow tall if you eat them off the tree. But some stories can lead to a heap of trouble, and that's exactly where Julian and Huey end up! This book has been selected as a Common Core State Standards Text Exemplar (Grades 2 – 3, Stories) in Appendix B. "You have to go a long way these days to find a book that leaves you feeling as happy as this one." —The New York Times "There's a glow here that's hard to resist." —Booklist

Solutions and Other Problems Springer
In this classroom favorite, a resourceful chicken enlists her farm friends to get a coveted hat from Scarecrow. A delightful circular tale and fall read-aloud! Chicken really

admires Scarecrow's straw hat. Scarecrow would gladly trade his hat for a walking stick to rest his tired arms. Chicken doesn't have a walking stick to trade—but she knows someone who does. Author-illustrator Ken Brown pairs vivid, realistic watercolors with an inventive plot, engaging sequencing, and repetition to tell a charming circular story packed with relatable themes of friendship, bartering, and problem-solving. This award-winning title is an ideal story time choice for autumn and harvest themes.

- New York Times bestseller
- The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “ At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot

and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope. ” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “ There ’ s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom. ”

—David Roberts, Vox “ This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook. ” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities

throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth ’ s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.
