Solutions and Other Problems Simon and Schuster

In this classroom favorite, a resourceful chicken enlists her farm friends to get a coveted hat from Scarecrow. A delightful circular tale and fall read-aloud! Chicken really admires Scarecrow's straw hat. Scarecrow would gladly trade his hat for a walking stick to rest his tired arms. Chicken doesn't have a walking stick to trade—but she knows someone who does. Author-illustrator Ken Brown pairs vivid, realistic watercolors with an inventive plot, engaging sequencing, and repetition to tell a charming circular story packed with relatable themes of friendship, bartering, and problem-solving. This award-winning title is an ideal story time choice for autumn and harvest themes. [Dinosaurs in Your Backyard](#) Tilbury House Publishers and Cadent Publishing The bestselling creators of the hilarious Penguin Problems, Jory John and Lane Smith, turn a giraffe's problematic long neck into an enviable advantage in this fun board book. Edward the giraffe can't understand why his neck is as long and bendy and, well, ridiculous as it is. No other animal has a neck this absurd. He's tried disguising it, dressing it up, strategically hiding behind bushes--honestly, anything you can think of. Just when he has exhausted his neck-hiding options and is about to give up, Cyrus the turtle ambles in (very slowly) and helps Edward understand that his neck has a purpose and, besides, looks excellent in a bow tie. Along with a heavy dose of humor comes a gentle reminder about the importance of acceptance.

Drawdown HarperCollins

A New York Times bestseller! Featured in its own episode in the Netflix original show *Bookmarks: Celebrating Black Voices!* Recipient of a Coretta Scott King Illustrator Honor

Award Recipient of an NAACP Image Award for Outstanding Children's Literary Work From Academy Award-winning actress Lupita Nyong'o comes a powerful, moving picture book about colorism, self-esteem, and learning that true beauty comes from within. Sulwe has skin the color of midnight. She is darker than everyone in her family. She is darker than anyone in her school. Sulwe just wants to be beautiful and bright, like her mother and sister. Then a magical journey in the night sky opens her eyes and changes everything. In this stunning debut picture book, actress Lupita Nyong'o creates a whimsical and heartwarming story to inspire children to see their own unique beauty.

The Three Little Pigs Macmillan

This is the story of a persistent problem and the child who isn't so sure what to make of it. The longer the problem is avoided, the bigger it seems to get. But when the child finally musters up the courage to face it, the problem turns out to be something quite different than it appeared. [What Do You Do With a Problem?](#) is a story for anyone, at any age, who has ever had a problem that they wished would go away. It's a story to inspire you to look closely at that problem and to find out why it's here. Because you might discover something amazing about your problem... and yourself.

[Real Kids, Real Stories, Real Change](#) National Geographic Books

Does your child have a hard time adapting to change? Children love routine but sometimes plans changes and they need to be able to easily go with the flow. [A Little Flexible Thinking SPOT](#) is a colorfully illustrated story that shows children how to solve problems, look at things in a different way and make it easier to adapt to change.

The Scarecrow's Hat Penguin

Integrate engineering and literacy into your

curriculum with this innovative approach to learning. Students will read fictional passages and solve problems using STEM and the engineering design process. Students can create devices and solutions using everyday materials. Each unit focuses on one problem and one challenge, but other problems are presented as options for future challenges. The activity pages invite individual and group work with room for brainstorming, problem-solving, building, testing, and reflecting.

[Making and Tinkering with STEM](#) Sylvan Learning Publishing Wall Street Journal Bestseller New York Times bestselling author Dan Heath explores how to prevent problems before they happen, drawing on insights from hundreds of interviews with unconventional problem solvers. So often in life, we get stuck in a cycle of response. We put out fires. We deal with emergencies. We stay downstream, handling one problem after another, but we never make our way upstream to fix the systems that caused the problems. Cops chase robbers, doctors treat patients with chronic illnesses, and call-center reps address customer complaints. But many crimes, chronic illnesses, and customer complaints are preventable. So why do our efforts skew so heavily toward reaction rather than prevention? [Upstream](#) probes the psychological forces that push us downstream—including “problem blindness,” which can leave us oblivious to serious problems in our midst. And Heath introduces us to the thinkers who have overcome these obstacles and scored massive victories by switching to an upstream mindset. One online travel website prevented twenty million customer service calls every year by making some simple tweaks to its booking system. A major urban school district cut its dropout rate in half after it figured out that it could predict which students would drop out—as early as the ninth grade. A European nation almost eliminated teenage alcohol and drug abuse by deliberately changing the nation's culture. And one EMS system accelerated the emergency-response time of its ambulances

by using data to predict where 911 calls would emerge—and forward-deploying its ambulances to stand by in those areas. Upstream delivers practical solutions for preventing problems rather than reacting to them. How many problems in our lives and in society are we tolerating simply because we've forgotten that we can fix them?

Between the World and Me Rodale Kids

A unique collection of competition problems from over twenty major national and international mathematical competitions for high school students. Written for trainers and participants of contests of all levels up to the highest level, this will appeal to high school teachers conducting a mathematics club who need a range of simple to complex problems and to those instructors wishing to pose a "problem of the week", thus bringing a creative atmosphere into the classrooms. Equally, this is a must-have for individuals interested in solving difficult and challenging problems. Each chapter starts with typical examples illustrating the central concepts and is followed by a number of carefully selected problems and their solutions. Most of the solutions are complete, but some merely point to the road leading to the final solution. In addition to being a valuable resource of mathematical problems and solution strategies, this is the most complete training book on the market.

Washington Post • People • Entertainment Weekly • Vogue • Los Angeles Times • San Francisco Chronicle • Chicago Tribune • New York • Newsday • Library Journal • Publishers Weekly In a profound work that pivots from the biggest questions about American history and ideals to the most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation's history and current crisis. Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? Between the World and Me is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, Between the World and Me clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

Spring Stinks Penguin

Ruth the bunny is excited to share the smelly springtime smells of spring with Bruce! But what will Bruce think of all that stink? Little Bruce Book Cartooning for Kids Chronicle Books The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of When: The Scientific Secrets of Perfect Timing Most people believe that

the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of To Sell Is Human: The Surprising Truth About Motivating Others). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

3rd Grade Reading Comprehension Success Workbook Harry N. Abrams

This story introduces and encourages readers to use SODAS (Situation, Options, Disadvantages, Advantages, and Solution) as a way to logically and thoughtfully figure out how to solve any problem, from the silly to the serious. What's the Problem? adds to the wildly popular Executive FUNction book series.

The Problem with Problems Createspace Independent Publishing Platform

How much? How many? How far? How small? Maths helps make sense of the world around us. How many mangoes are needed to make a jar of pickle? How many toes do the monsters under the bed have? How many days till the new moon? Let's Do This Together is filled with stories that cleverly weave everyday maths problems into the narrative so children can easily solve them with the help of a parent, teacher or friend. As they start with sums that are easy-peasy, move to mostly easy and then to ones that are not that easy, the book helps them build their self-confidence and number proficiency. Sulwe Random House Books for Young Readers
