[Approaches to Summarization](#) John Benjamins Publishing

To address Common Core State Standards (CCSS) for reading and language, today ' s educators strive to help their students develop higher-level understanding with challenging materials. In this book, we share our method for implementing an integrated strategy approach for helping readers understand expository text. This approach can be used to accompany and extend text structure instruction on the five most commonly used expository text structures: compare and contrast, cause and effect, problem and solution, description, and sequence. Within this approach, we designed a method for using key vocabulary in a way that helps readers think about the structure of the text. To aid in the development of higher-level understanding with challenging materials, this approach integrates other essential reading comprehension components that foster understanding, such as predicting and summarizing. The Structure Sort integrated approach

embeds these essential strategies before, during, and after reading to empower students to make connections and build comprehension at all stages of reading. *When Lunch Fights Back* Corwin Press Learning, Problem Solving, and Mindtools is inspired by the substantial body of learning research by David H. Jonassen in the areas of mind tools and problem solving. The focus of the volume is on educational technology, especially with regard to how new technologies have facilitated and supported problem solving and critical thinking. Each chapter focuses on a particular aspect of learning with technology and elaborates the implications for the design and implementation of learning environments and activities aimed at improving the conceptualization of problems, reasoning and higher-order thinking, and solving challenging problems. This collection of scholarly essays provides a highly engaging treatment of using tools and technologies to improve problem solving; multiple perspectives on integrating educational technology to support learning in complex and challenging problem solving domains; guidance for the design of instruction to

---

support problem solving; a systemic account of the relationships between mental models, instructional models, and assessment models; and a look into the future of educational technology research and practice.

**Literacy in African American Communities** IAP

To acquire content knowledge through reading, students must understand the complex components and diverse purposes of informational texts, as emphasized in the Common Core State Standards (CCSS). This practical book illuminates the ways in which a text's purpose, structure, details, connective language, and construction of themes combine to create meaning. Classroom-tested instructional recommendations and "kid-friendly" explanations guide teachers in helping students to identify and understand the role of these elements in different types of informational texts. Numerous student work samples, excerpts from exemplary books and articles, and a Study Guide with discussion questions and activities for professional learning add to the book's utility. ÿ

**Teaching Text Structures** Corwin Press

Nearly every state has

independently adopted the Common Core State Standards (CCSS), making this practical guide an indispensable resource for grades 3-5 teachers and teachers-in-training. Leading authorities explain each of the English language arts (ELA) standards and vividly show how to implement them. The book is filled with grade-specific classroom vignettes, instructional strategies and activities, sample lesson plans, and discussion questions. Chapters cover the major ELA strands: reading (literature, informational texts, and foundational skills); writing; speaking and listening; and language. Issues of assessment and technology integration are also explored. An appendix includes thematic units for each grade level demonstrating ways to embed CCSS/ELA standards into content-area instruction. See also Teaching with the Common Core Standards for English Language Arts, PreK-2.

A Local Assessment Toolkit to Promote Deeper Learning

Gunter Narr Verlag

This volume explores the unique sociocultural contexts of literacy development, values, and practices in African American communities. African Americans--young and old--are frequently the focus of public discourse about literacy. In a society that values a rather sophisticated level of literacy, they are

---

among those who are most disadvantaged by low literacy achievement. Literacy in African American Communities contributes a fresh perspective by revealing how social history and cultural values converge to influence African Americans' literacy values and practices, acknowledging that literacy issues pertaining to this group are as unique and complex as this group's collective history. Existing literature on literacy in African American communities is typically segmented by age or academic discipline. This fragmentation obscures the cyclical, life-span effects of this population's legacy of low literacy. In contrast, this book brings together in a single-source volume personal, historical, developmental, and cross-disciplinary vantage points to look at both developmental and adult literacy from the perspectives of education, linguistics, psychology, anthropology, and communication sciences and disorders. As a whole, it provides important evidence that the negative cycle of low literacy can be broken by drawing on the literacy experiences found within African American communities. *Does Text Structure/summarization Instruction Facilitate Learning*

Balloons Over Broadway IGI Global

This book presents a perspective on genre based on what it is that leads users of a language to recognise a communicative event as an instance of a particular genre. Key notions in this perspective are those of prototype, inheritance, and

intertextuality; that is, the extent to which a text is typical of the particular genre, the qualities or properties that are inherited from other instances of the communicative event, and the ways in which a text is influenced by other texts of a similar kind. The texts which form the basis of this discussion are drawn from experimental research reporting in English. Contents: 1. Introduction 2. Approaches to genre 3. Genre and frames 4. A sample analysis: Writing up research 5. Summary and conclusions.
