Problems in chemistry are
considered unsolved when an
expert in the field considers it

unsolved or when several experts
in the field disagree about a

solution to a problem. Physical
chemistry problems What are the

electronic structures of high-
temperature superconductors at

various points on their phase
diagrams? Can the ...

Problems in Physical Chemistry -
Google Books

Practice makes you perfect. And
physical chemistry is no

exception to this adage. Physical
chemistry involves a fair bit of

calculations. So it is extremely
essential to practice problems. As

you practice more, you become
familiar with the numbers and

the constants that are involved in
the problems.

List of unsolved problems in chemistry - Wikipedia

Problems in Physical

Chemistry - Google Books

In my opinion the most important unsolved problem in chemistry is the polymerization of hydrocarbons, e.g. putting methane in a single reactor and getting naphtha and diesel out of it. The day that can be done the entire petrochemical industry will transform.
