UPTET Paper 2 Exam : Social Studies | 7 Mock Tests + 3 Previous Year Papers (1500+ Solved Questions) Oswaal Books and Learning Private Limited
This self-readable and student-friendly text provides a strong programming foundation to solve problems with C language through its well-supported structured programming methodology, rich set of operators and data types. It is designed to help students build efficient and compact programs. The book, now in its second edition, is an extended version of Dr. M.T. Somashekara's previous book titled as Programming in C. In addition to two newly introduced chapters on 'Graphics using C' and 'Searching and Sorting', all other chapters of the previous edition have been thoroughly revised and updated. The usage of pseudocodes as a problem-solving tool has been explored throughout the book before providing C programming solutions for the problems, wherever necessary. This book comes with an increased number of examples, programs, review questions, programming exercises and interview questions in each chapter. Appendices, glossary, MCQs with answers and solutions to interview questions are given at the end of the book. The book is eminently suitable for students of Computer Science, Computer Applications, and Information Technology at both undergraduate and postgraduate levels. Assuming no previous knowledge of programming techniques, this book is appropriate for all those students who wish to master the C language as a problem-solving tool for application in their respective

disciplines. It even caters to the needs of beginners in computer programming. KEY FEATURES • Introduction to problem-solving tools like algorithms, flow charts and pseudocodes • Systematic approach to teaching C with simple explanation of each concept • Expanded coverage of arrays, structures, pointers and files • Complete explanation of working of each program with emphasis on the core segment of the program, supported by a large number of solved programs and programming exercises in each chapter NEW TO THE SECOND EDITION • Points-wise summary at the end of each chapter • MCQs with Answers • Interview Questions with Solutions • Pseudocodes for all the problems solved using programs • Two new chapters on 'Graphics using C' and 'Searching and Sorting' • Additional review questions and programming exercises

IBPS PO 9 Year-wise Preliminary & Main Exams Solved Papers (2011-19) Oswaal Books and Learning Private Limited

This guide highlights the many forces driving professionals to seek continuing education: rapidly changing information; new technological developments; mandated credit to maintain licenses and professional certification; emerging professions struggling to define their competencies; and development changes in adults that affect career practices. In developing programs for professionals, common themes run across settings and groups. The guide focuses on these similarities and helps experienced continuing professional education (CPE) planners. CPE begins at the point when formal education ends and professional practice starts. Seven topics important to the CPE planner are addressed: (1) professionals as learners; (2) professionals in society; (3) providers of CPE; (4) regulation of professions and implications for CPE; (5) a planning framework; (6) competencies of a CPE planner; and (7) useful tools for planning. The guide contains 42 references and 7 appendices: (1) needs assessment methods; (2) learning objectives; (3) categories of instructional format; (4) seating

arrangements; (5) sample evaluation questions; (6) building a program budget; and (7) timetable for program development activities. (NLA)

Oswaal ISC Sample Question Paper Class 11 (Set of 5 Books) Account, Eco, Business Study, English 1 & 2 (For 2022 Exam) SAGE Publishing India

Women in Science and Technology: Confronting Inequalities comprehensively explores women's status in the Science and Technology (S&T) domain by rigorously analysing and interpreting extensive recent information on major areas such as engineering, medicine, physical sciences, biosciences and mathematics. The book forcefully demonstrates that gender-based differences and expectations play the determining role in limiting women's participation in S&T. These exist in various forms, from making subject choices in school and opting for specific disciplines in college to embracing specific career avenues such as scientific research. This book shows how the construction of gendered identities is perpetuated through a masculine culture in the informal environment of elite educational institutes and in major S&T workplaces such as academia and research laboratories, which serve together to exclude women from peer groups and opportunities for advancement. The book makes substantive recommendations for policy measures on college admissions, improvement of institutional and organizational environments, and recruitment and capacity building for women in S&T. It calls for substantially reducing the myriad societal and familial barriers through cooperation and understanding.
