Introduction to Programmable Logic Controllers Career Education
This book contains various applications of programmable logic controllers and SCADA designing of a plant. Nowadays, all human handled plants are being replaced by automatic control systems, thus called Automation. PLCs are accepted worldwide for easier access and better precision. In this book Rockwell PLCs are described and so is the SCADA design, which is also done by the RSVIEW32 software, manufactured by Rockwell. It is one of the biggest names in the PLC software industry, being easy to use, control and modify. Some electrical drives, such as D.C drives and A.C drives, are also described in detail because the control part is done by the PLCs but

the main plant is based on these electrical drives.
Essentials of Electronics McGraw-Hill Education
This fourth edition of Programmable Logic Controllers continues to provide an up-to-date introduction to all aspects of PLC programming, installation, and maintaining procedures. No previous knowledge of PLC systems or programming is assumed. As one reviewer of this edition put it "I honestly believe that someone with little or no background to PLC systems could take this book and teach themselves PLCs".
Fundamentals of Programmable Logic Controllers, Sensors, and Communications McGraw-Hill Education
"Programmable logic controllers (PLCs) continue to evolve as new technologies are added to their capabilities. As PLC technology has advanced, so have programming languages and communications capabilities. Today's PLCs offer faster scan times, space efficient high-density input/ output systems, and special interfaces to allow non-traditional devices to be attached directly to the PLC. Now in its Sixth Edition, changes made to the content of the text have been made solely based on reviews from current instructors and

include: material that should be added or deleted from chapters topics requiring more in-depth coverage increased integration of the ControlLogix platform of controllers chapter modifications require to meet current curriculum needs"--
