I need assistance with building a quiz app in Windows Forms c#  
Windows Forms is a framework located in the System.Windows.Forms.dll assembly for building Windows applications in .NET based on a graphical user interface (GUI). Any language that supports the common language runtime (CLR) can use Windows Forms.

Build desktop apps for Windows PCs -  
Windows applications ...

To run the program, type samp (or, on some UNIX machines, ./samp). On a DOS or Windows machine using DJGPP, at an MS-DOS prompt type gcc samp.c -o samp.exe. This line invokes the C compiler called gcc, asks it to compile samp.c and asks it to place the executable file it creates under the name samp.exe. To run the program, type samp.

In this article. There are several

broad categories of Windows

applications that you can create

with C++. Each has its own

programming model and set of

Windows-specific libraries, but

the C++ standard library and third-

party C++ libraries can be used in

any of them.

### Overview of Windows Programming in C++ | Microsoft Docs

On GNU/Linux, GCC is almost always included by default.. On

Microsoft Windows, Dev-C++ is recommended for beginners because it is easy to use, free, and simple to install. Although the initial developer (Bloodshed) hasn't updated it since 2005, a new version appeared in 2011, made by an independent programmer, and is being actively developed. An alternate option for those working only in the ...
