## Projects For My First Mac

Tap File > Open and navigate to your Empty ASP.NET Core app. From a Terminal / bash prompt, run dotnet restore to restore the project 's dependencies. Alternately, you can enter command shift p in Visual Studio Code and then type dot as shown: You can run commands directly from within Visual Studio Code, including dotnet restore and any tools referenced in the project.json file, as well as custom tasks defined in .vscode/tasks.json.

## Add photos and videos to your iMovie project - Apple Support

I just tried to start a simple iOS project in Visual Studio, and it's saying that it cannot find a Mac Build Host. Most frustrating of all, the Xamarin site has no information at all on what a Mac Build Host is. I've popped up the command prompt in Windows and perfectly able to ping my Mac machine, so it's definitely viewable from Windows.

## How to Choose the Best PM Software for Mac | Smartsheet
