The Pocket Book of Proofreading Macmillan

Connect and Involve: How to Connect with Students and Involve Them in Learning is a practical handbook of strategies and procedures for teaching at all grade levels—elementary, middle, and high school. The secret to increasing teaching effectiveness is to make small changes in what teachers think and do—and to get their students to make small changes in what they think and do. Every time teachers connect with students and involve them in learning, teachers engage them in powerful ways that make it more likely that they will choose to learn and to do quality work. This book shows how to be a more effective teacher through small changes in planning and classroom procedures. Each chapter focuses on a key strategy, and each chapter head and its subheads are an outline of how to put the strategy into practice. Teachers can preview all the ideas by reading the chapter titles, heads, and subheads. There are no prescriptions here; teachers bring their expertise on the age group, the subjects they teach, and the big ideas and key skills students need to achieve on high-stakes testing. The strategies and procedures provide ways for teachers to evaluate where small changes can make a difference in achievement for their students.

The New Harbrace Guide: Genres for Composing (w/ MLA9E Updates) McGraw Hill Professional
This textbook provides instruction in college level rhetoric and writing. It offers readings, a research manual, a handbook and supports a range of approaches to teaching and learning, including collaboration, visual rhetoric, personal writing, writing about literature, writing in the community and the workplace, field research, portfolios, oral presentations, essay exams, and ESL. It contains step-by-step guides to writing specific kinds of essays -- remembering events, writing profiles, explaining a concept, finding common ground, arguing a position, proposing a solution, justifying an evaluation, speculating about causes, and interpreting stories. Because so much college writing requires strong argumentation skills, four of the assignment chapters focus on argumentative writing, and a separate strategies chapter covers theses, reasons and support, counterarguments, and logical fallacies. Three full chapters on research give students useful strategies not only for conducting field, library, and Internet research, but also for evaluating sources; deciding whether to quote, paraphrase, or summarize; avoiding plagiarism; and documenting sources. The authors have included 39 readings by well-known authors and various "fresh" voices, including 12 students, providing well-written examples of the different types of essays and papers that students might be asked to complete.
